

DRAFT FEDERAL REGISTER INSERT:

On March 19, 1996, the Review Board was provided additional evidence regarding certain records on which it previously had made determinations. (These prior determinations were noticed at 61 *Federal Register* 6346, 6346 (February 20, 1996).) Upon reconsideration, and in the light of additional information received from the Department of State, the Review Board modified its prior determinations by extending the release date to August 1, 1996, for redacted material in these records that had been scheduled for immediate release under the Review Board's prior determinations. For each of these new determinations, the number of releases of previously redacted information immediately follows the record identification number, followed in turn by the number of postponements sustained (including postponements of information to be released on August 1, 1996), and the date further information in the record is scheduled to be released:
