

MEMORANDUM

July 18, 2017

TO: Dr. Anna Nelson

FROM: Eileen Sullivan

SUBJECT: document samples

Per your request, I have put together sample documents that show that the Board can open documents without posing a threat to national security.

I have attached the seven NSA documents that we made available to the media and the public in August 1997, as well as one consent release document. There are no "before" documents for the NSA samples because they were never available in any form whatsoever before the Board voted on them.

I have also attached a CIA document relating to operational plans in Cuba. There are two copies of this document, displaying the version before the Board voted, and after.

I hope these documents suffice. Please let me know if there is anything else you need.
