Hello	(b)(3)
I know we have briefly discussed this program before. Do you have a product brief/trifold that we can look at as a refresher?

Good morning,	(b)(3
NRO's Sentient R&D as a UAP Model to look for UAP in imagery, but we need an external customer to ask	
for it to be turned on. (b)(1)	

And you are our primary customer.	
So would you mind assisting us.

(U) SENTIENT

(U) DESCRIPTION

(U//FOUO) SENTIENT is an AS&T research and development framework that enhances the GED operational framework. Sentient emulates key elements of the NRO's existing and future ground architecture. The framework is anchored around a problem-centric overhead system tasking and collection process that employs to support an adaptive closed-loop cycle.

(U//FOUO) ENTERPRISE IMPROVEMENTS

- · Faster identification, characterization, and behavior prediction of targets and activities
- Data-driven decisions for future ground architecture
- Improved tasking, collection, processing, exploiting and dissemination efficiency through correlation of large and disparate data sets
- Perspective and buy-in closed-loop ground solutions
