Houston:- you have any more information - estimate distance or size?

s/c:- ^{Borman} We also have the booster in sight.

Houston:- understand you also have the booster in sight. ^{roger,}

s/c:- ^{Borman} We have ~~new~~ ^{new} ~~eyes~~ ^{eyes} ~~money~~ ^{money} a - it looks like hundreds of a going little particles going by ~~to~~ ^{to} the left out about 3 to 4 miles

it looks like a path of the wheel at 90 degrees

Hauston:- Roger understand they're about 3 to 4 miles away

s/c:- ^{Borman}they passed now - they're going into solar orbit

Hauston:- Roger understand they were 3-4 miles away

s/c:- that's what it appeared like. that's Roger.

Hauston:- ~~gmm-7~~ Hauston - were there particles in
addition to the booster and the bogey at 1 o'clock ^{high}

PAO :- there were several references to the bogey
this is the unidentified object in addition to
~~the~~ particles which appears to be headed in a
polar orbit - you heard Frank Bowman
say plus Jim Lovell describe discussing
the boaster it was Bowman who reported
sighting the bogey - this is General Contak in
Houston at 4 hrs 24 min into the flight.

Time:- 05 min: 34 sec.
