Please attempt to determine a Lat / Long for the contact at initial detection. We recommend using [REDACTED] to reference the sensor-derived bearing and range relative to the bullseye you had in use. If that method is not available, any reasonable derivation of location will work, but please be as specific as possible and make a note in the comments section. These locations may be used to cue other means of tracking.

Was the contact moving? Yes

Direction/Speed
(Ex. 090/15)

Please use the field below to describe the contact and any interaction in your own words with as much detail as possible. Please be sure to include any detail not included in questions above.

Don't use the purple "submit" button! Save this form with filename "Date_Squadron_RF.pdf" and email it to [REDACTED] (Also in the global). For troubleshooting, call [REDACTED]

Thank you for your time. Please ensure all display tapes are ripped for the entire time of interaction and saved as a .wmv (Example: [REDACTED]). Squadron intel personnel shall upload those files to the repository located at [REDACTED]

~~SECRET//NOFORN~~

[REDACTED] we were operating in the [REDACTED] airspace, when [REDACTED]

[REDACTED]
[REDACTED] it traveled with the wind, the closer we came to it. It was hard to assess the true direction of travel, but it was generally in a southern direction. [REDACTED]
[REDACTED]

[REDACTED] We noted no maneuvers or change in direction from the object [REDACTED]
[REDACTED] The object itself was a darker, maroonish color, approximately 12-15ft in height. Structurally, it appeared as a large, somewhat deformed balloon, but we were unable to verify that as we passed at the merge. [REDACTED]
[REDACTED]

[REDACTED] We then
proceeded back to the ship, landing uneventfully.
