

FEDERAL BUREAU OF INVESTIGATION

Date of entry [REDACTED] 2026

[REDACTED] Special Agent [REDACTED], [REDACTED]
[REDACTED] telephone number [REDACTED]
[REDACTED], email address [REDACTED] was interviewed at [REDACTED]
[REDACTED] Agent [REDACTED],
email address [REDACTED] participated in the interview.
After being advised of the identities of the interviewers and nature of the
interview, [REDACTED] provided the following information:

[REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED] He
has held this position since [REDACTED] He has been with [REDACTED] since [REDACTED]. He has
no aviation expertise. He has [REDACTED] of private pilot time.

On the day of [REDACTED] 2026, [REDACTED] was positioned at [REDACTED]
[REDACTED]. Others with him include [REDACTED] SA [REDACTED]
[REDACTED]

At approximately time 1604 he was alerted to an RF detection at [REDACTED]
[REDACTED] at 10K MSL for 5-10s at 90 burst with an unknown bearing.
Further communication clarified a request to observe at bearing 58 degrees.

Within a few minutes, [REDACTED] used a [REDACTED] Thermal optical device to
look in the direction of 58 degrees. He saw a black object in the sky. It
was not moving fast. He took pictures using the optical device. While
observing he saw a second object to the right of the first and took
additional photos/videos. The objects were moving together at the same
speed. Both were black hot. He lost view of the objects when they traveled a
distance out of view. Total observation time was approximately 5 - 10
minutes. [REDACTED] is unable to estimate an altitude or speed. The objects
were above the mountain line. They were moving in the direction of SE,
approximately 58 degrees to 62 degrees. Given the distance of the objects it
was difficult for [REDACTED] to determine direction of travel.

[REDACTED] was the only one at his location to see the objects. He was the only
one who used the optic. The [REDACTED] agent looked at the photos [REDACTED]
