67.1 P-8A OBSERVES UNIDENTIFIED LOW-FLYING OBJECT 55 NM NORTHWEST OF LATAKIA, SYRIA

18 NOV 2016

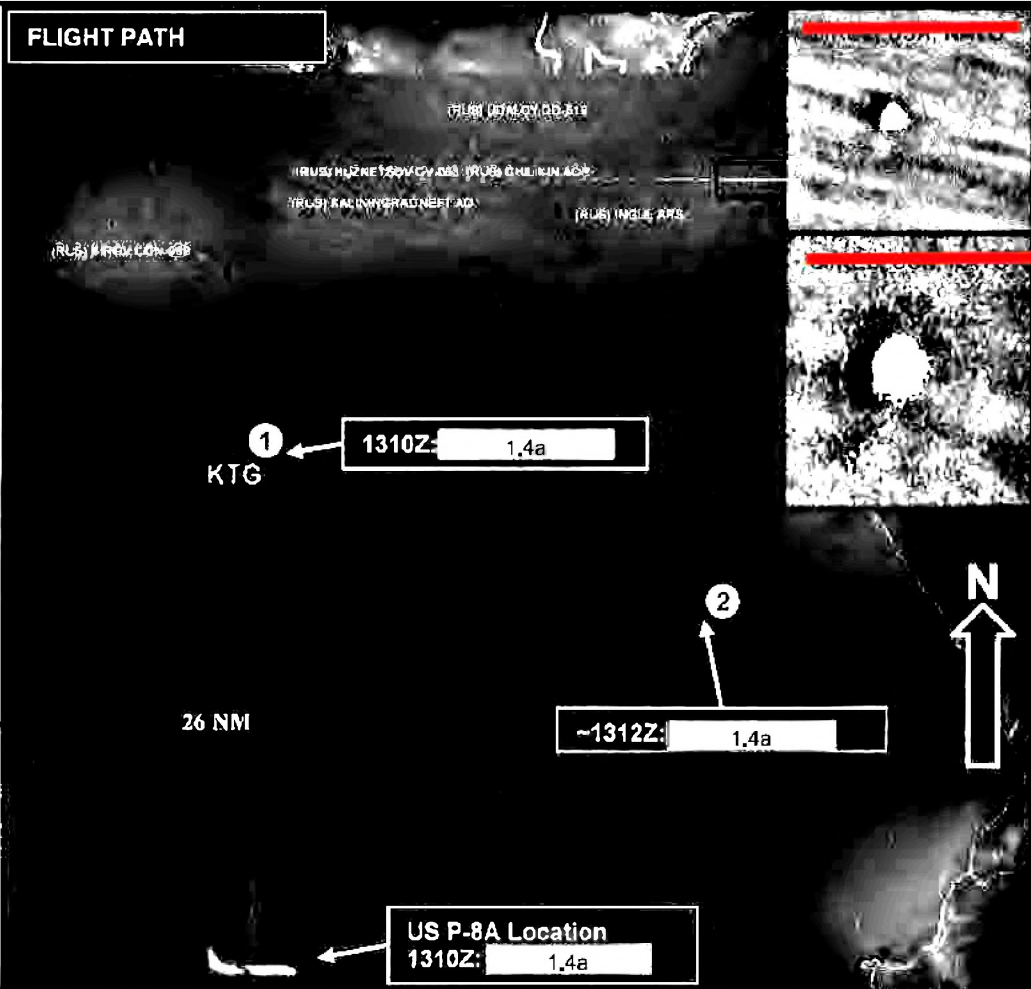

BLUF: While monitoring KCTG activity in the Eastern Mediterranean, P-8A, observed an unidentified low-flying object 55 nm northwest of Latakia from an unknown origin, traveling at approx 500KTS on a southeasterly heading outbound from KCTG, for ~2 minutes.

Timeline (Z):

- ① ~~SECRET~~ 18/1310Z: P-8 observed a possible missile launch IVO [redacted] 1,4a from an origin unknown detected via the EO/IR sensor. The possible missile appeared to be in sea skim mode traveling at approximately 500KTS on a southeasterly heading outbound from KCTG. P-8 position was 26NM S of object detection at 16121 FT [redacted] 1,4a
- ② ~~SECRET~~ 18/1312Z: - P-8 lost visual of the object IVO [redacted] 1,4a approx. 40 NM northwest of Latakia. The missile was observed to pass between (RUS) INGUL ARS and 1x U/I vessel.

Weather:

(U) P-8 aircrew characterized visibility as clear, no range limitations.

CTG 67.1 Comments: The mission commander for P-8 characterized the interaction as safe. While this was the first observed occurrence of possible missile activity by P-8 aircraft in the Eastern Mediterranean it is assessed to be standard activity consistent with the assessed activity of the KCTG. Video footage can be found at this link: [redacted] (b)(6)
