SEARCH FOR AMELIA EARHART
RUSSIANS SET AIR RECORD
HEAT WAVE 192

OK

VOLUME 35 RELEASE 67

25 years ago

(Hold four feet lite) Twenty-five years ago the world's most famous aviatrix was missing over the Pacific. Amelia Earhart, on a globe-girdling flight with navigator Fred Noonan, took off for the hop over trackless ocean wastes and was never heard from again. On the chance that she might be safe on some then-remote island, an intensive air-sea search got underway immediately, but not even wreckage was ever found. Many and a varied have been the theories on the disappearance - such as the possibility that she wandered to the Island of Truk, then being secretly fortified by the Japanese, and was executed to keep those plans secret. For a quarter-century the world has wondered. (LITE)

66

Twenty-five years ago the Russians were setting air records just as they are today. Three Russian airmen landed south of Los Angeles after a flight from Moscow over the North Pole. They set a distance record of six thousand six hundred miles, a thousand miles further than the record set four years previously by two Frenchmen. The huge single-motored plane was undamaged in landing and the three airmen suffered no injuries - they returned later to Russia, and to Russian cheers that were to echo twenty-five years later for Soviet spacemen. (Lite)

122 The nation was in the grip of a record heat wave -- everybody was talking about the weather and most everybody was doing something about it. As the Mercury climbed and climbed and climbed, the kids were quick to improvise with showers in city streets ...those elders who weren't red with the heat turned green with envy. (LITE)

153 Many a tale was told as Secretaries figured out a way to get dictation down to a cold science. (LITE)

163 And fan mah brow if inventors didn't some up with some red hot IDEAS on how to cool a fevered forehead. Horatio Casterbuilt figured that his skimmer would drop the temperature a few degrees. WHAT if that fan ever got in his hair? Well, toupee or not toupee.....

SUBJECT (25 YEARS AGO) 25 years ago the world's most famous aviatrix was missing over the Pacific. Amelia Earhart, on a globe-trotting flight with navigator Fred Noonan, took off for the hop over trackless ocean wastes and was never heard from again. On the chance that she might be safe on some then remote island, an intensive air-sea search got underway immediately, but not even wreckage was ever found. Many and varied have been the theories on the disappearance - such as the possibility she wandered to the Island of Truk, then being secretly fortified by the Japanese, and was executed to keep those plans secret. For a quaeter-century the world has wondered. 25 years ago, the Russians were setting air records jus as they are today. Three Russian airmen landed south of Los Angeles, after a flight from Moscow over the North Pole. They set a distance recrod of 6,600 miles, a thousand miles further than the record set four years previously by two Frenchmen. The huge single-motored plane was undamaged by landing and three airmen suffered no injuries - they returned later to Russia and cheers that were to echo 25 yeard later fpr Soviet Spacemen. The nation was in the grip of a record heat wave - everybody was talking about the weather and most everybody was doing something about it. As the Mercury climbed and climbed and climbed, the kids were quick to improvise with showers in city streets those elders who weren't red with the heat turned green with envy. Many a tale was toldas Secretaries figured out a way to get dictation down to a cold science. And fan mah brow if inventors didn't come up with some red hot ideas on how to cool a fevered forehead. Horatio Casterbuilt favored that his skimmer would drop the temperature a few degrees. What if that fan ever got in his hair ? Well, toupee or not toupee..... (OUT)
