

SECRET

p-113

8 JAN 1960

MEMORANDUM FOR: Chief of Operations, DD/P
 SUBJECT : Project LIAFTW (Renewal)
 WH - Mexico

1. The attached project, originating in WH Division, is presented for renewal for the period 1 December 1959 through 31 November 1960. The project provides for physical and photographic surveillance operations in support and exploitation of other Mexico City operations, particularly those targetted at Soviet personnel and installations.

2. Authority is requested to obligate \$84,910 from the DD/P-WH Division operating budget: \$48,485 for fiscal year 1960 and \$36,425 for fiscal 1961, subject to the availability of funds. These sums include \$61,910 compensation for five contract agents (three of whom serve as principal agents for segments of the project), and sixteen support agents; \$3,500 for vehicle maintenance and commercial carrier travel; \$7,500 for operational equipment; \$5,000 for maintenance of three safehouses; \$2,000 for additional safehouse, post office box, and vehicle rental; \$1,000 exchange commodities; \$2,000 "key" money, broken contracts, etc.; and \$2,000 for the purchase of information, documents, payment of bribes, etc.

3. The attached renewal request, prepared in the Division and supported by a project review prepared in the Field, reviews the activities of the project during the past year and present a detailed breakdown of the funds requested. The project operates in three segments: (a) Contract agent Oliver G. SCANTLING is an independent asset who is used to follow-up and exploit operational information on target personnel and installations, to case various installations of interest, acquire property, etc.; (b) a photographic surveillance team, under principal agent Raymond H. GERENDE, utilizing three houses or apartments and one photo truck; and (c) a physical surveillance team under principal agent Simon D. CLACKETT, consisting of three trained members at the present time. The attached renewal request reviews the activities and accomplishments of the project in terms of these three segments and in relation to project objectives. SCANTLING's contribution to the collection of operational information pertaining to Soviet personnel and installations is regarded by the Station as unique. He also

SECRET

SECRET

trained CLACKETT in radio controlled mobile surveillance. SCANTLING also has rendered valuable support to the LITACIT operation having gained entry to the target under a fabricated cover. He has also cased and prepared reports on the LITABBY target in preparation for future operations and performed investigations of numerous other Station targets of opportunity. He investigated many leads from other audio-surveillance operations enabling the Station to maintain current data on various Soviet contacts and resulting in a recruitment attempt which, while unsuccessful, is believed to indicate future potential along this line. He has further been used to develop radio procedures for the mobile teams and to rent various properties in support of other Station operations. The GERENDE segment, using three base houses for photography, produced upwards of 12,000 photographs during the year. One base has recently begun taking motion pictures of Soviet personnel in the course of conversation which have been forwarded to FI/D for possible exploitation by lip reading analysis. This segment also operates the mobile radio surveillance vehicles. A mobile photography surveillance truck has been used during the project year for coverage of various Station targets which do not warrant the establishment of permanent photographic bases. GERENDE has also served to rent post office boxes, hotel rooms, etc., in support of other Station operations. During the past project year CLACKETT, who returned to Mexico in early April 1959 after Headquarters training, spent the following two months being trained by SCANTLING in mobile surveillance techniques. He then undertook training of a four member team which was judged ready for operational use toward the end of the project year. Two additional contract agents, Wilma J. FIORDALISI and Louise J. MACRINO, performed translation and support functions.

4. Appropriate staff components concur in recommending renewal.

(a) CI Staff notes that the CI value of the project is difficult to judge since it appears that much of the material produced remains in the Station for exploitation. However, CI Staff remarks that the value of the project should be increased when the CLACKETT surveillance team enters into active operation. CI Staff suggests that the Station be queried as to the pretext or circumstances under which SCANTLING frequently visits Inez Parade de Moreno, the occupant of the property adjacent to the Soviet installation.

SECRET

SECRET

(b) FI/OPS notes that while the project review presents a clear picture of the aims and objectives of the various segments, it does not provide, except in the case of SCANTLING, detailed indication of the value or usefulness of the other segments, particularly the photographic activity. FI/OPS requests that the Station provide such an appraisal during the first quarter of 1960. FI/OPS recommends strongly that the photo coverage be reviewed from the standpoint of value and usefulness with a view to determining whether the LILYRIC activity could not be safely eliminated and the additional photographic coverage conducted on a more selective basis, without materially affecting overall usefulness. FI/OPS notes that, in the absence of further proof of usefulness, the color photography and moving pictures appear to be an unnecessary luxury. FI/OPS commends the careful handling of the CLACKETT segment and requests that the next project action include examples of the team's progress.

5. I recommend renewal of Project LIEMPTY as presented with attention to the staff comments in paragraph 4 above.

~~SECRET~~~~SECRET~~

I. CURRENT OBJECTIVES AND PRODUCTION RELATED THERETO

A. Oliver G. SCANTLING Segment (in relation to project objectives.)

1. "To collect operational information pertaining to LIMERICK personnel and physical facilities." SCANTLING has continued to provide worthwhile information in support of this objective. (See previous project review forwarded by HMMA-20052 of 18 October 1962.) During the past year SCANTLING was used to follow up leads produced by both LIFEAT and LIENVOY in support of this objective. In particular SCANTLING provided, in blueprint detail, casing reports on the homes of two Soviet intelligence officers who are targets for Station technical operations.

SCANTLING also is used to aid the Station in maintaining current records of the residences of Soviet personnel living in Mexico. This is accomplished by SCANTLING's followup of LIENVOY leads which indicate Soviet interest in renting specific properties.

2. "To collect operational information pertaining to other targets of opportunity, foreign official installations and personnel of intelligence interest operating in Mexico." SCANTLING has proved successful in providing information on other Station targets:

- a. SCANTLING obtained information on AEMIQUELET-2, a suspect Soviet support agent which was the basis of further Station operations against this target.
- b. SCANTLING provided a casing of the former Yugoslav Commercial Office against which the Station had planned a technical operation. However, this site was evacuated by the target mission before plans were completed for this attempt.
- c. SCANTLING has conducted detailed investigations in various cases involving possible agents or contacts of hostile intelligence services. These cases were of prime concern to Station Mexico but frequently were undertaken at the request of Headquarters or other Stations.

3. "To provide support to other Station operations as may be requested by the Station officers concerned." In the past SCANTLING's activities in this area were concerned primarily with recruitments, debriefings and surveillances. During the reporting period, however, the weight of SCANTLING's support to other Station operations have taken other forms. Examples from this area of activity include the most fruitful efforts on SCANTLING's part:

~~SECRET~~~~SECRET~~

~~SECRET~~

2-

- a. Support of the sensitive AMROD operation, in which Raymond H. GERENDE also played a vital role, was of singular importance to the success of the operation. SCANTLING's many fields of operational experience were drawn on fully and he thereby provided a unique contribution to the operation. Without the assistance of SCANTLING and GERENDE with their unique qualifications, this operation would have been difficult in the extreme if indeed at all possible.
- b. In support of the Station's harassment campaign against Juan Jose AREVALO Bermejo, launched at the request of Headquarters, SCANTLING again provided the means for carrying out a large portion of the action taken. SCANTLING's efforts ranged from the mailing of "poisoned" candy to the target to the placing of threatening phone calls. SCANTLING also made calls to various Mexican newspapers and mailed "montage" pictures of AREVALO and a Soviet intelligence officer to Guatemalan newspapers in the campaign to discredit and discourage AREVALO in the Guatemalan Presidential campaign.
- c. SCANTLING is used as the alternate contact in a sensitive LAURICLE project. This is for the purpose of minimizing the danger of the action agent in this project being recognized as being in contact with an obvious PBPRIME citizen. SCANTLING's contribution to this operation has been noteworthy both from the standpoint of security and agent handling.
- d. SCANTLING continued to conduct numerous pretext and neighborhood investigations. As in the past many of these investigations were in relation to highly sensitive cases.

4. Although SCANTLING's LIEMPTY project objectives can not be completely fulfilled, it is the Station's opinion that SCANTLING continues to make valuable contributions to the objectives of the project and to other Station activities. SCANTLING's production, measured against monetary expenditure, case officer time and other intangibles factors, unquestionably justifies his continuing as an integral part of Project LIEMPTY.

B. Raymond H. GERENDE Segment (in relation to project objectives):

1. "To collect operational information pertaining to WEMERICK personnel and physical facilities through use of photographic basehouses." Three photographic bases, LIMITED, LILYRIC and LICALLA, contribute to these objectives. Although SCANTLING now acts as cutout with the LIMITED base, GERENDE continues to be responsible for the processing of all photo take from the LIEMPTY operation including take from LIMITED. To avoid repetition, the Station is omitting the description of the functions of these three bases and how they contribute to the above objective. This was fully described in the 1960 Request for Project Renewal (HMMA-15979).

~~SECRET~~

3-

2. "To collect operational information and identify operational leads pertaining to Station targets of opportunity." The LIENTRAP operation, handled by GERENDE, is still the major contributor to this objective. LIENTRAP operational emphasis continues to remain in the area of photo stakeout of prominent Mexican Communists and is presently working fulltime on providing pictures of individual Communists, homes suspected of being meeting sites used by the Communist Party and the Communist Party Headquarters itself. LIENTRAP has also recently begun to be used on ZRKNICK leads. It is expected that activities of LIENTRAP in that latter area will expand in the coming year.

3. "To provide operational support to Station operations including the renting of hotel rooms and safe apartments, renting and servicing of post office boxes, and conducting counter-surveillances." GERENDE's contribution to the AMROD operation was noted in paragraph I.A.3.a. above. GERENDE's comprehensive area knowledge and personal operational capabilities enable him to make a valuable contribution in such operations as AMROD and also enable him to procure the most desirable safe sites in support of the Station's operations. The project's assets, particularly GERENDE and LIEMPTY-10, presently provide 20 post office box mail drops for use of Mexico City Station and other Stations. Although it is planned to reduce this number considerably during the next year, (since other Station assets now can provide a number of live accommodation addresses), a number of post office boxes will be retained for use in future operations.

4. The quality and quantity of operational information produced by the photographic bases and other activities under GERENDE's control and supervision is considered by the Station worthwhile and in some cases unique. It is concluded, therefore, that this segment of the LIEMPTY Project should be continued.

C. Relationship to the Related Mission Directive

As noted in the examples given above, Project LIEMPTY has provided valuable support to many Station operations and thereby has been a contributing factor to the fulfillment of the Related Mission objectives of the Station. The project has not produced any positive intelligence nor is it intended to do so. The project's sole purpose is to provide a mechanism for the development of operational information.

II. CHANGES

The one major change made in the LIEMPTY Project was the replacement of GERENDE by SCANTLING as contact with the LIMITED basehouse. This was arranged so as to provide GERENDE with more time for rapid processing of the LIEMPTY phototake. It also makes for better rapport with the basehouse keeper (LIEMPTY-6) since SCANTLING is closer in age to him than is GERENDE.

Louise J. MACRINO (ps) suffered a recurrence of the heart condition which nearly caused her death approximately eight years ago. Complete rest has been

~~SECRET~~~~SECRET~~

4-

ordered by her doctors and an operation may be necessary in early 1964. It is therefore unlikely that she will be able to work during the coming project year. Station does not plan to request cancellation of her operational clearance at this time, but has not included salary payments to her in the estimated costs of the project for the coming year.

The unusual salary increase reflected for LIEMPTY-19 in the "Project Costs" (below) section for the coming year is due to this agent's new duties of LIFEAT processing in addition to her old duties as translator. Agent's OA was amended for this use on 2 January 1963.

III. EFFECTIVENESS

The comments made concerning the project's effectiveness in the Project Renewal of 1960 (HMMA 15979) remain valid. Indeed the Station's need for the type of services provided by the assets of this project are at least as great today as they were when those comments were originally forwarded.

IV. PROBLEMS

There are presently no known major problems facing the operation which would affect either the security or the effectiveness of this operation. The security problem facing the LICALLA portion of the operation and described in HMMA-15979 and subsequent renewal requests has been resolved by the Cuban Government's release of three KURIOT personnel earlier this year. As was noted previously, one of this group had knowledge of the LICALLA operation.

Both SCANLING and GERENDE took the LCPLUTTER during the month of October 1963. No security problems were revealed by this test.

V. PLANS

The Station considers that the project is operating at its optimum size and does not plan to expand it during the coming year. Efforts will be continued to refine and better utilize the existing project organization and to improve the compartmentation and security of the project.

VI. COSTS

A. Past Project Year - Station records show that Project LIEMPTY expended approximately \$US 30,680.00 during FY 1963 (1 December 1962 - 30 June 1963) and has to date in FY 1964 (through 30 September 1963) expended \$US 7,620. Approximately \$US 10,300 will be expended during the last two months of the project year. This will make a total expenditure for the project year of about \$US 48,600 or \$US 1,500 under that which was allotted for this project.

B. Next Project Year - Of the total \$US 49,700 budget, itemized below, approximately \$US 30,290 will be expended in FY 1964 and the remainder \$US 19,410 in FY 1965.

Review of Project LIEMPTY

(For the purpose of Project Renewal)

I. CURRENT OBJECTIVES AND PRODUCTION

A. Oliver G. SCANTLING Segment (discussed in relation to project objectives):

1. "To collect operational information pertaining to LIMERICK personnel and physical facilities." SCANTLING has continued (see previous Project Reviews forwarded as attachments to HMMA-17999, 31 October 1961, HMMA-14093, 13 November 1959, and HMMA-15979, 18 November 1960) to provide worthwhile information pertaining to this objective. During the past year SCANTLING has continued to be used extensively to follow up leads produced by LIFEAT and LIENVOY. An excellent example of this blending of various Station support assets was the investigation and casing performed by SCANTLING after leads from both LIENVOY and LIFEAT indicated the possibility of launching a successful technical operation against the residence of a high ranking LIMERICK intelligence officer assigned to Mexico under diplomatic cover. With the aid of the thorough casing report and neighborhood investigation completed by SCANTLING, Station KURIOT personnel, supported by other Station support assets, were successful in installing a technical device in the target.

SCANTLING continues to be the Station's primary means of keeping current records on the residences of the many Soviet personnel in Mexico City. This is primarily accomplished through SCANTLING's follow up of all LIENVOY leads which indicate interest by Soviets in specific quarters. (See previous project renewal requests for additional details.)

2. "To collect operational information pertaining to other targets of opportunity, foreign official installations and personnel of intelligence interest operating in Mexico". SCANTLING is very useful for collecting information on other Station targets:

a. On the basis of a lead from the ODACID installation in Veracruz, the Station (with Headquarters support) mounted an operation to unobtrusively sabotage a large unit of agricultural machinery (of U.S. origin) which was in transit to Cuba. To mount this operation, a precise and detailed casing of the implement was essential. This SCANTLING was able to accomplish in one trip to Veracruz with results that contributed substantially to the operation.

~~SECRET~~

Excluded from automatic downgrading and declassification

level - 2 - HMMA - 20052

58 - [Signature]

~~SECRET~~

- 2 -

b. SCANTLING provided the Station a detailed investigation of Harotun ("Harry") KOPOLAN, employee of American Communists Albert and Margaret MALTZ, which determined the residence of KOPOLAN as well as his family status and connections.

c. In the Satellite area, SCANTLING completed a casing of an official Yugoslav installation in conjunction with a projected Station technical operation.

3. "To exploit operational leads through recruitments, debriefings, and surveillances." SCANTLING has contributed to this objective both directly and indirectly as noted in the following examples:

a. SCANTLING completed a detailed and secure interview of the fiancée of BESMOOTH to determine her connection with the principals in the MCMAYFOWL case, particularly any connection with procurement of documents used in the flight behind the Iron Curtain. This assignment was extremely sensitive (SCANTLING was not told true reason for interview) and SCANTLING did an admirable job while maintaining his cover for having the interview.

b. SCANTLING was called on for extensive initial spade work in the BEKNAVE/BECHICK operation. SCANTLING gave his usual competent performance despite the fact that the role assigned him was unique to his experience.

c. SCANTLING performed one man surveillance of a sensitive Station Soviet double agent which contributed significantly to that operation.

d. SCANTLING was used extensively during the visit of GPIDEAL as part of the Station's effort in providing maximum protection for the GPIDEAL party.

e. In addition, SCANTLING performed numerous pretext and neighborhood investigations, some of which were highly sensitive. SCANTLING also does most of the local investigations requested by ODACID and other ODYOKE components.

4. In addition to his contributions to the above objectives, SCANTLING is used for miscellaneous support requirements from the Station. For example, SCANTLING handled LIEMBROIL-2 until the return of LIMOTOR-14 in July 1962. SCANTLING is also used to spot and rent safe houses and apartments for other Station operations.

~~SECRET~~

Excluded from automatic downgrading and declassification

~~SECRET~~

5. As stated in the preceding Requests for Project Renewal, although SCANTLING's LIEMPTY Project objectives can never be completely fulfilled, it is the Station's opinion that SCANTLING has made important and valuable contributions to LIEMPTY Project objectives specifically and to other Station activities in general. SCANTLING's production, measured against monetary expenditures, case officer time and other intangible factors, unquestionably justifies his continuation as an integral part of Project LIEMPTY.

B. Raymond H. GERENDE Segment (discussed in relation to project objectives):

1. "To collect operational information pertaining to LIMERICK personnel and physical facilities through use of photographic base houses." Three photographic bases, LIMITED, LILYRIC and LICALLA, contribute to this objective. To avoid repetition, the Station is omitting the usual description of the functions of these three bases and how they contribute to the above objective. This was described in detail in the 1960 Request for Project Renewal. (HMMA-15979)

2. "To collect operational information and identify operational leads pertaining to Station targets of opportunity." The LIENTRAP operation, handled by GERENDE, is still the major contributor to this objective. Among LIENTRAP's regular and extensive photographic assignments, was the photo stakeout of prominent Mexican Communists (some of whom have never been photographed previously by KUBARK) and Communist Party Headquarters. During this assignment, LIENTRAP was able to cover the recent move of PCM Headquarters (the first information Station had of the move) and to continue photo surveillance at the new site.

3. "To provide operational support to Station operations, i. e., rent hotel rooms and apartments, and conduct counter-surveillances." GERENDE is used frequently to rent hotel rooms and apartments for other Station operations and activities. GERENDE's comprehensive area knowledge and personal operational capabilities combine to make him an extremely valuable Station asset for such support activities. GERENDE also procures and services post office box letter drops for the many Station operations requiring them.

~~SECRET~~

GROUP 1
Excluded from automatic
downgrading and
declassification

~~SECRET~~

4. The quality and quantity of operational information produced by the photographic bases and other activities under GERENDE s control and supervision is considered worthwhile and in some cases unique. The Station concludes, therefore, that this segment of the LIEMPTY Project should be continued.

C. Relationship to Related Mission Directive Objectives:

As stated in previous project renewals, it can readily be noted that Project LIEMPTY has provided support to many Station operations and in this manner has been a contributing factor to the furtherance of the Related Mission Directive. The project has not produced any positive intelligence nor has it been intended that it should do so. The project's sole purpose is to provide a mechanism for the development of operational information in support of other Station operations.

II. CHANGES

There have been no changes in the LIEMPTY Project during the past project year affecting either objectives or personnel.

III. EFFECTIVENESS

There has been no change in Project LIEMPTY which would alter the validity of the remarks made in Section III of 1960 project renewal request (HMMA 15979)

IV. PROBLEMS

The security problem in connection with the LICALLA operation, which was described in 1960 renewal request, is still present but has caused no known difficulty. At Headquarters suggestion in HMMW-9736, the LICALLA base was reactivated on 29 May 1961. The base operator continues to be alert for any unusual incidents which might indicate that the base has been compromised.

V. PLANS

The Station considers that the project is operating at its optimum size and does not plan to expand it during the coming year. Efforts will be continued to refine and better utilize the existing project organizational arrangements. As in the past, the Station will continue its efforts to improve the compartmentation and security of the project.

~~SECRET~~

GROUP 1
Excluded from automatic
downgrading and
declassification

~~SECRET~~

- 5 -

VI. COSTS

A. Past Project Year - Station finance records indicate that Project LIEMPTY expended approximately \$26,250 during Fiscal Year 1962 (1 December 1961 - 30 June 1962) and has thus far during Fiscal Year 1963 (through 30 September 1962) expended about \$7,000.00. It is anticipated that about \$8,000.00 will be expended during the last two months (October and November 1962) of the project year. This will make a total expenditure during the project year of about \$43,250, or \$6,250.00 under the budget estimate of \$49,500.00.

B. Next Project Year - Of the total \$49,900.00 budget, itemized below, approximately \$30,400.00 should be expended during the remainder of Fiscal Year 1963 and the balance, \$19,500.00 should be expended during Fiscal Year 1964. Normal accounting procedures will be used for all expenditures.
