SUBJECT { GENERAL Operational GREPIC 02  
SPECIFIC Transmittal of GRATOMIC 1 Clandestine Photographs Taken During May 1955

REF: EAVA-11529, 15 August 1955

1. Transmitted herewith are 407 clandestine photographs taken by GRATOMIC 1 during the month of May 1955. All of them were taken with the "chest camera" described in the reference and previous correspondence. The numbering system is the same as and a direct continuation of that used for the initial GRATOMIC 1 photographs transmitted with the reference.

2. It should be noted that a considerable proportion of the "take" during May was shot at the Trattnerhof in an effort to secure photographic coverage of USIA officials. It is our hope that it will be possible sometime during the near future to show all the Trattnerhof photographs taken to date (and no more will be taken from now on) to DS 623. If we succeed in this objective, we shall of course report the results to Headquarters without delay. You will further note that the photographs Nos. G 32.1 through G 32.13 are not transmitted with the attached. These prints are now available only in single copy, and will be transmitted after they are shown to DS 623. Additional copies of this series were not printed, since in general they were of relatively poor suitability for identification work.

3. In general, it is felt that the coverage during May shows a distinct improvement, both technically and with respect to successful coverage of targets of interest, over that transmitted along with the reference. At the present time, GRATOMIC 1 coverage of sensitive areas is being temporarily suspended, both in order to avoid burning him through overuse and because the VCB Technical Support Section, in the midst of its move from GRATLAS to GRBAIL, is not able to process photographs. We intend, as the post-occupation Soviet establishment becomes more clearly definable, to deploy GRATOMIC 1 against installations of this establishment in order to determine which Soviets, especially KIS officers, are staffing the new sub-st.
