RECTORIO REVOLUCIONARIO ES

echeverrio con tua ideas en marcha

PROFAGALDA _

Redio Ersadeasts-al "Trinenera"

days - .: o: days and Thullays 7-30 ca. 12.30 p.m. wednesdays and Saturdays 9-15 p.m.

Broadcusted turough Radio "Navier" and 20 more

b) Dramatical broadcasts on Sunlays through Radio Eccatoriana. Also sometimes through madio Tarqui. (popular station).

liewspapers"Li Comercio" (Quito)
"El Telemrato" (Gunyaquil) "El Universo" (Guayaquil)

de can count on those of Guayaquil for any help we need. On "El Comercio", only lately because the wirector was changed. -

Lagarine "La Calle" Two pages each week. This magazine has a wide circulation.

The ARIE movement distributes our propulanda. They are Falancistas (of the Faulanx roup) but work very efficiently. Leaves of gropaganda thrown out under the mane of Accion auticommutate, group or a nized and directed by the wels, atlon-university student group which is in contact with "Brigadas".

Lately, photos of the Dks mirtyrs were launched throw hout the streets

Organizations established by the Delegation-1-Accion anti-com: ista Ecuatoriana.

2-Conite Pro-obtencion Salvoconductos. (Committee to obtain safe-conducts)

3-Comite Pro-Patria y Libertad (Fatherland and reedom)

Except Accion atticommista, the other two or anizations are troit with no support at all.

LOULUM

Lator accomplianed by the Lele Ltion at Equator.

- a) Foll !cal :ield isos contacts whit the political parties:
 - a) Fatilio Conservador
 - b) Loviziento Independiente

 - c) ARE
 d) oviniento Social Cristiano.

for the last elections the members of the Independente joined the Conservadores, winning the Deputy House and most of the alcaldias (mayor's offices) waysoull and laja.

he can rely fully on these two groups. They were decisive elements in the breaking of relations.

(4) Student field

- al him school
 - We have its full surport, but holdeno incluence.
- b) Jr. Iversity

roup "brigadas" Jaiversitarias which has accomplished a great labor inside the student field and in the Indian sector. It is of left-tendency but was democratic origin.

Universitad de Guayaquil

The democratic forces joined together for the last elections and . . successed openly. The structure was mainly led by the "Erigadas". he have the complete support of this Fall.

Universidad de Quito

The executive comittee is controlled by the Communists. Its president is kilton Burkans. We have connections inside the executive committee with the representatives of Contology, Victor Renarace , and of Arcuitecture, Marcelo Aviles.

This committee is fully controlled by the Vice-Frincipal of the Central Frierestry of Quito, Manuel & Aprile (Commist and avia defender of Castro) Luis Verlesuto, dean of Pullosopay and menter of the Party and Canvel Araujo midal o, also member of the Party and personal friend of Cestro.

Ine residents of the facilities are mostly democratiq, except Enrique Lalle os (rolitical sciences) The representatives in the university Youncil are all lemocrats except the one of Joontolo y Lelson Plente, and wilson Perales.

Elections are held in Q. ito in the conth of hovember. we are sure se

S-E-C-R-E-T

UFGA-5728

5-1-C-R-L-1

was held on 17 August 1962. The meeting was not successful. Behind these activities, and concurrent to them, JMWAVE continued processing of 1) the PM Cedar team; 2) organization of an AMSPELL intelligence section and training of an intelligence team (DAMSON) consisting of a radio operator and two agents; and, 3) administratively, the processing of all 201 files, updating them to include PRQ Parts I and II. MOC (if applicable), Secrecy Agreements, and technical/psychological assessments where appropriate.

In summing up the JNWAVE-ANSPELL control relationship, there is no panacea; if one statement could be applied to describe it, however, it would be simply that: In spite of rapport at Case Officer level, there is not JMWAVE control because of a conflict between AMSPELL objectives (PBRUMEN liberation soonest) and continued ODYOKE lack of PBRUMEN policy.

3) Intelligence Production:

WAVE-1415 - Truck Convoy in Area of Trinidad.

WAVE-1416 - Foreign Personnel at Guatana - Pinar del Rio.

WAVE-1442 - Arrival of Soviet Ships at Casilda.

WAVE-1456 - Arrival of Soviet Vessels at Casilda & Trinidad.

WAVE-1457 - Arrival of Soviet Ships at Banes.

4) Development and Plans:

All planning phases of AMSPELL activities supported by JMWAVE at the present time are subject to the results of meetings with AMSPELL concerning increased control, and, the decisions of JMWAVE to continue a support relationship if an acceptable degree of KUBARK control can be established. Meanwhile, however, in the developmental stage is the organization and training of an AMSPELL Intelligence Section, to function independent of AMSPELL normal operations and directly in confunction independent of AMSPELL normal operations and two secretaries with JMWAVE. This will consist of two officers and two secretaries who will process information gained from debriefing male and females who will process information gained from debriefing male and females who will process information gained from debriefing male and females which will combined with this effort, is the DAMSON intelligence team, which will be formed around radio operator AMHINT-52 who has returned to operational status. The target date for infiltration of the DAMSON team is 15 October 1962. (See Attachment A.) Also, the CEDAR team, a PM team destined for Oriente Province returned from Isolation training and are awaiting infiltration. (See Reference G.)

5) JMWAVE-AMSPELL Contact Plan:

In accordance with Reference H request for JMWAVE-AMSPELL contact arrangements, the following plan is submitted:

PAGE NO

CONTINUATION OF DISPATCH

S-E-C-R-E-T

UFGA-5728

ANHINTS: Statley R. ZANKA as "Dr. Neza" mects:
ANEINT-2 for regular PN operational purposes. Bernate PENA as his alternate

ZAKKA has also met with Jose Maria LASA U. upong occasion concerning LASA's direct liaison with Headquarters through Fletcher Y. Knight.

b. AMBARBS:

Robert Q. NELANDER as "Josse DAVEGA" meets: ANSARB-84 as regular operational contact. AKEARB-16 as occasional policy/admin contact ANSARB-53 as occasional policy/admin contact.

MHINT/2

AXEMARD as an emergency AMBARB contact. Pedro YNTERIAN Garcia as emergency AMBARB contact

AMSPELL:

Barold R. NOEMAYR as "Roger Fox" meets: Pecro YNTERIAN Garcia as regular PW operational Cordinator.

AVHINT-2 as regular overall AMSPELL control. ANSINT-49 Radop for processing CEDAR team. ANSINT-52 Radop for processing DANSON team. AXSINT-30 during processing AMHINT maritime. ANEXEB-54 occasional legal/international.

:B. ANHINTS:

August began with euphoria among AMHINTS because of the return of some of their members who had participated in the AMBARB delegation to Helsinki and the reports of successful agit/prop carried out at the Communist Youth Festival held there. This was not enough, however, to offset the continuing frustration of failure to exfiltrate AMHINT-53 on the RANYAN series of operations. Although AMHINT-2 had no returned from Helsinki and West Berlin as yet, the acting leadership of AMSPELL vented their ire in a 6 August memorandum to JMWAVE, in which JMWAVE was blamed for much of the support failures in the AMHINT section and too much operational interference in the AMBARB functions. An urgent "interview" was requested.

When AMHINT-2 finally returned, a meeting was held with him on 17 August. ZANKA, NOEMAYR, and NELANDER represented AMHINTS, AMSPELL and AMBARBS, respectively, and during a two-hour session, discussed the points set forth in the ANSPELL memorandum, and much of the JMWAVE control problem with AMSPELL. In retrospect, the meeting could not be considered a success. Although some ANHINT paramilitary operational problems were resolved, AMHINT-2 was adamant in retaining control of AMBARB funding of at least one official delegate in each country. He refused to even discuss LCFLUTTER for himself - he did however assure those present that this was personal and that other AMSPELL leaders may submit at their own discretion. One issue which could have made for more rapport in the meeting, was that of support for their vessel, the JUANIN I, which has been processing for about six months. Negotiations on this point eventually fell through completely when AMSPELL rejected the terms of the Maritime Vessel Support Agreement. The meeting as concluded with arrangements for special meetings on the discordant points in the near future.

These meetings never materialized, for in the interim JNWAVE opted to approve the ANBARB funding arrangement - at least for the moment - and play a waiting game on AMHINT-2 refusal to accept tech ical and psychological assessment. Possibly, when all other leaders had been assessed, AMHINT-2 could then be issued an ultimatum, essentially "shaming" him into acceptance.

About this time, 20 August, another message was received from AMHINT-53 (Reference B). He advised AMSPELL headquarters in Miami that he would arrive on the 21st - no request for an operation, no mention of mode of travel, point of exit or entry. And as the days passed no sign of AMHINT-53 either.

UFGA-5728

Meanwhile, on 22 August, ANSPELL Coordinator Pedro YNTERIAN Garcia, reported that AMHINTS in PBRUMEN would transmit a shortwave declaration sometime between 24 and 26 August concerning the buildup of Soviet/Bloc men and materiel in PBRUMEN. This broadcast was to come from the vicinity of Havana en about 3500 to 3700 Kcs, and some time between 2100 and 2300 hours local time. (Reference C) Although AMSPELL had been working fervently at collection of intelligence on this very topic, the report seemed strange to the JMWAVE Case Officer who had over the past four months been attempting to supply the electronic materials requisite to just such an undertaking. This was dismissed, however, as another example of students' ingenuity and improvising. KOLA and RIMM were asked to monitor the report, but was forgotten until the early morning of 25 August.

The AMHINT raid on the Rosita HORNEDA (now Sierra Maestra)
Hotel and the Blanquita (now Chaplin) Theatre in the Miramar section of Havana at about 2330 hours local time on the night of 24 August 1962 has been reported substantially in Reference D. The press has covered it to the point of satiation, but the essential press reporting was forwarded in Reference E. As the smoke of cannon and cold war exchanges cleared, the operation could be analyzed for what it was, and what it meant to JNWAVE in terms of the control relationship with AMSPELL.

As stated earlier in this report, it was an Agit/Prop action designed to alert the peoples of Latin America, and impress upon the world, the reality of the Soviet buildup in PBRUMEN. It was also destined to - albeit students are apolitical by classical definition - place AMSPELL in a leading political position in framework of Latin American and PBPRIME anti-CASTRO, anti-Communist activities. AMSPELL realized this and prepared for a deluge of propaganda on the action. By the time JMWAVE had received instructions from Headquarters to caution them about gloating over their success, this propaganda campaign was already launched. Publicity was a buyers market for them and there was not enough AMSPELL participants or officials to satisfy the demands of press, television, radio, and personal appearances. Their degree of foresight and organization can be appreciated by the fact that the AMBARBS throughout the hemisphere were standing by with instructions for agit/prop should ODYOKE have decided to prosecute the AMHINTS participating in the action.

JMWAVE, however, cannot afford to be very objective about AMSPELL revolutionary zeal that not only aggravates the cold war exchanges, but places the Task Force - and ultimately, KUBARK - in an awkward and untenable control position as far as PBRUMEN independent action is concerned. It would be no overstatement to say that this exile group could sink a Soviet vessel and force ODYOKE to the brink of Therefore, on 30 August, when AMPALM-4 reported that the AMSPELL attack on Havana was the first of a three-phase plan, the second stage being an attack on a Soviet vessel in Havana Harbor - Subsequently abandoned in favor of an attack on a surfacecraft in Caibarton Harbor it was obvious that the JMWAVE/KUBARK control relationship with AMSPELL must be submitted to a profound and firm reappraisal. This was done under the supervision of REUTEMAN and through a series of conferences with TROUCHARD, ZAMKA, NOEMAYR and NELANDER. The results were reported to Headquarters by REUTEMAN in WAVE-7899 on 30 August In short, this Reference reviews the AMSPELL independent course of action, consequent liability KUBARK, framework of the JAWAVE relationship with AMSPELL and present commitments, and pointed out that the ultimate test of the control issue would be the severance. Headquarters comments and concurrence of AMSPELL support funds. were requested but during the first week in September, this problem was treated during a series of conversations between the Chief of Station and the Chief of Task Force. A final decision is pending at the date of this writing.

- 2) Total ANHINT Support August 1962:
 - Intelligence Production: (Reported under Para 1A. 3)
- 4) Development and Plans:

All ANSPELL development and planning are dependent upon solution of the control issues outlined in this report.

C. ANBARB:

No new AMBARB assignments of personnel to delegations in Latin America were made during August 1962, and no representatives of AMBARB were withdrawn from their areas of assignment. Therefore the personnel assignment listing for AMBARB given in the June Progress.

Report (UFGA-4840, dated 20 July 1962) is accurate, except for the addition of AMBARB-8 and AMBARB-77 to the delegation in Uruguay and of AMBARB-85 to the delegation in Costa Rica, as reported in the June Progress Report. No travel of AMBARB personnel to Miami occurred during the month of August except for the trip of AMBARB-75 from Bogota on 10 August for a stay of several weeks during which to renew his resident visa. AMBARB-16 departed 22 August 1962 for an inspection tour of Latin American delegations (WAVE-7468 and WAVE-7441) concerning which a report will be furnished; a main purpose of this trip was for AMBARB-16 to explore the AMBARB mailing operation capabilities.

A listing of AMBARBs awaiting assignment has been furnished in UFGA 5739; a listing of dropped AMBARBs has been furnished in UFGA-5703

The AMSPELL raid on Havana 24 August 1962 provided the dominant theme for ANBARB exploitation subsequent to that event Inasmuch as this adventure was undertaken without JMWAVE knowledge or concurrence and counter to the policy of our government, it would be superfluous of us to comment that we regard the event with misgiving from a stand-point of KUBARK "control" over AMSPELL. At the same time, a clear distinction must be made between the activities of the AMBARB section of ANSPELL and those of the organization's military leadership: essentially, AMBARB serves only to promote propaganda activity in the Latin American countries where AMBARB delegates are assigned; and additionally some delegates work on covert assignments with local KUBARK stations in fulfilling GYROSE objectives. The overt tasks of the AMBARBs, however, serve to exploit the propaganda value of such events as the 24 August raid and to capitalize upon information demonstrating the failures of Castroism and Sovietization of Cuban life; as such, the ANBARBs are themselves removed from the center of such controversial activities as the 24 August raid or the threats of AMHINT-2 against shipping in Cuba. Naturally, the AMBARBs support the policies of their organization and the statements of its leader; as noted above, they could also bring their facilities to bear to embarass ODYOKE, at the behest of AMHINT-2, in the even AMSPEND ished to mount a concentrated propaganda barrage condemning ODYOKE response to AMSPELL's unilateral undertakings. It is clear that the AMBARD potential to mount any such campaign of support for ANSPELL can be controlled by KUBARK only to the extent that local stations have direct dealings with the AMBARBs in Latin America. JMWAVE, for it s part, exerts every possible effort to assure that AMBARB representatives will not engage in any propaganda action likely to embarass ODYOKE We are encouraged to believe that, while or GYROSE policy courses. We are encouraged to believe that, while overall JMWAVE control of AMSPELL appears negligible at this time on the large issues of striking direct blows against targets of opportunity, we do have fairly good control over the subordinate AMBARB leadership within AMSPELL.

CONTINUATION OF DISPATCH

S-E-C-R-E-T

DISPATON STREET, AND NUMBER

UFGA-5728

Basic JMWAVE policy in respect to the AMBARB Section of the AMSPELL organization has been set forth in considerable detail in our regular monthly progress reports for May, June, and July 1962; our earlier remarks are still valid, and the reader is referred to them for a synopsis of our relationship with AMBARB and the general JMWAVE attitude towards future development of this group. It should be kept in mind that AMBARB is not a group over which KUBARK is in a position to exercise absolute control, but on the other hand it must be regarded as a distinct entity within AMSPELL itself whose potential JMWAVE hopes to develop at a separate pace without permitting AMBARB assets to become embroiled in controversy over AMSPELL paramilitary undertakings.

AMBARB is sensitive to what it would regard as any KUBARK attempt to "take over" its organization; therefore, in the matter of local Station funding of ANBARBS, we have agreed that at least one ANBARBS delegate in each county will continue for the present to receive his salary directly from AMBARB. AMBARB argues that only by this means can AMBARB retain the minimum control over its people necessary to insure satisfactory execution of overt AMBARB propaganda activities (the funding for these overt activities will also continue to be paid for the present by AMBARB to its delegates). JAWAVE does not believe it would serve a useful purpose at present for local Stations to attempt to fund these regular AMBARB activities, since it should be remembered that these overt ANBARB activities give the organizations its public reason for being and, therefore, a cover facility under which AMBARBS may be utilized by local Stations for covert activities. Since AMBARB is jealous of administering the funds for its overt activities, JNWAVE feels it should be permitted to do so for the sake of KUBARK rapport with the group. At the same time, although AMBARB delegates receive from AMBARB propaganda materials, thematic guidance, and funds to cover local expenses in carrying out the overt AMBARB mission, local Stations are not precluded from exerting influence on AMBARB activities supporting GYROSE objectives. Since the local Stations will be paying the salaries of all but one AMBARBsin their areas. as well as funding covert activities, it should be possible for local Stations to influence overt AMBARB work substantially. By agreement with AMSPELL, all covert utilization of AMBARBS by local Stations is strictly by arrangement between the ANBARB representatives themselves and the local Stations, and AMSPELL expects no information concerning such covert use either from JNWAVE or from its AMBARB representatives in the field.

Over a period of time, we expect that local Stations will gradually take over complete AMBARB funding. For example, in Chile the Santiago Station has assumed funding of all three AMBARBs, although BD-3269 required that it fund only one AMBARB. We convinced AMSPELL to accept this situation, so that in effect the Santiago Station will exercise direct, local control of AMBARB salaries, even though AMBARB will continue for the time being to send the delegation \$600 monthly ion the conduct of overt AMBARB activities in Chile.

There is an additional advantage in permitting AMBARB to pay the salary of at least one of its delegates by mail from Miami and in allowing AMBARB to disburse funds, provided by JMWAVE, for overt AMBARB activities. By this means JMWAVE is in a position to obtain from AMBARB a coordinated monthly progress report of the total overt AMBARB work; this report, forwarded in the group of attachments to this dispatch, in turn furnishes Headquarters with a single point of reference in assessing the overall AMBARB overt effort. Naturally, for its part, JMWAVE does everything possible to elicit from AMBARB as complete an accounting as possible of the monthly propaganda activity undertaken by each AMBARB delegation throughout Latin America. Since it is doubtful that a timely, coordinated picture of all AMBARB activities in all countries could be obtained by means of separate local Station progress reporting on overt AMBARB work, JMWAVE considers this system the most satisfactory for keeping tabs on such widespread activities; we are doubtful that any centralized control

CLABSITY

DISPATCH STANDE AND HAMPE!

S-E-C-R-E-T

UFGA-5728

ever AMBARB propaganda could be achieved without permitting the AMBARB office in Minmi to retain some semblance of control over AMBARB delegations in the form of a monthly allowance of salary for at least one AMBARB representative.

Helsinki Youth Festival

A report prepared by AMBARB on ANSPELL/AMBARB participation in the Helsinki Youth Festival is forwarded, together with examples of press coverage, in Attachment B. Also appended to Attachment B are two reports, with photographs, obtained from AMPAD-1 on the Festival.

Delegation Reports

Following is a list of Attachments covering local AMBARB delegation activities in the various Latin American countries. At its descretion Headquarters may wish to draw portions of these reports to the attention of local KUBARK Stations or discuss them with the interested WH Division desks:

Bolivia; Attachment C

Brazil; Attachment D

Chile; Attachment E

Colombia; Attachment F

Costa Rica; Attachment G

Ecuador; Attachment H

Mexico; Attachment I

Panama: Attachment J

Uruguay; Attachment K

Venezuela; Attachment L

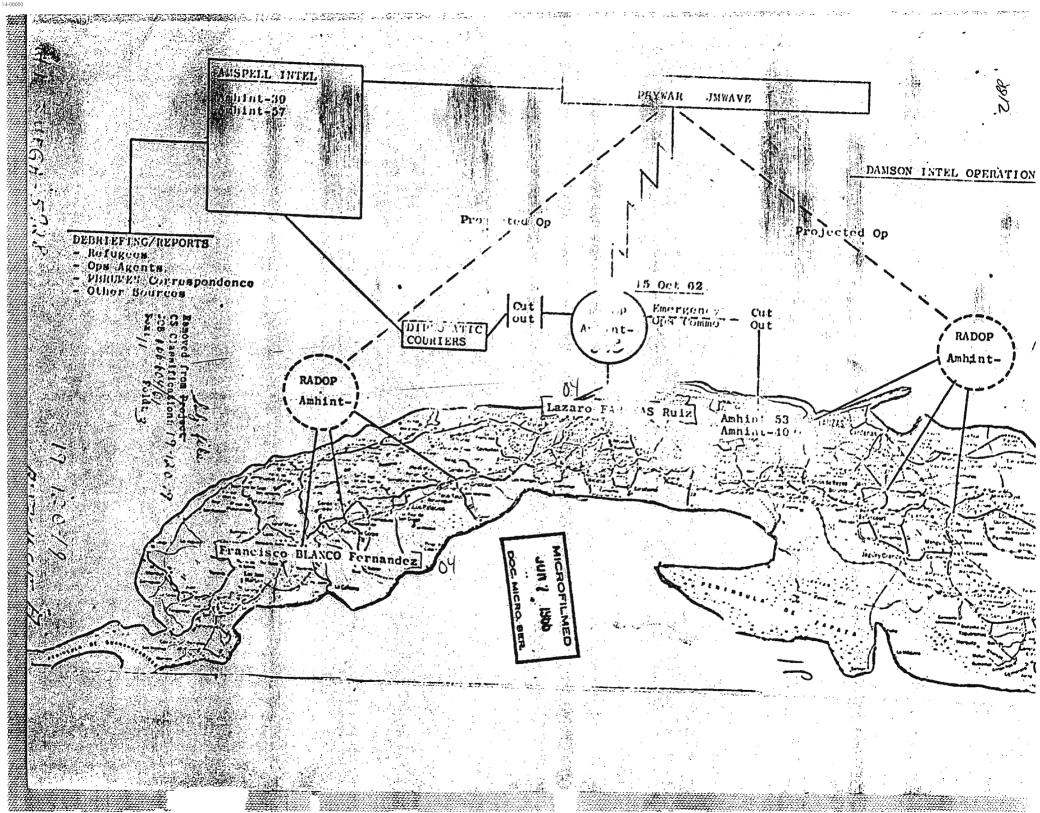

1) Development and Plans

General plans for the future remain unchanged as reported in Progress Reports for the last three months. A number of AMBARBS are awaiting assignment, as reported in a separate dispatch cited above. Our main undertaking for the future will be to insure an orderly and gradual transfer of AMBARB representatives to local Station control, without impairing AMBARB morale by depriving the AMBARB office completely of administrative responsibility, as discussed above. JAWAYE believes it is in KUBARK's interest for the local Stations to fund the majority of AMBARBs in the field; at the same time the AMBARB Miami office will continue to fund the minimum of AMBARBS necessary to insure an orderly flow of AMBARB propaganda material to local LA outlets through the AMBARB delegations, to guarantee timely reporting from AMBARB delegations to the central AMBARB office in order to enable preparation of an overall progress report by AMBARB and JMWAVE on overt AMBARB activity, and finally to insure the responsiveness of AMBARB to JMWAVE efforts to step up recruitment of delegates suitable for covert use by WH Station in meeting GYROSE objectives.

The first Press confortnes convoked by the President of the Perminent Organization Committee, John Sarcias, and old at the Olimpia Notel in the presence of 250 johnnalists.

The newsparareen made continual incutries on Jarcias about the low number of attendants at the Fartival (9,000) as compared to the 30,000 attendants at the Sixth Fartival hold in Poscova. Jarcias affirmed that the Fartival relied on the support of 74 Wational Student Unions, that is, with the 50% of world students. Poscover, Gracias ignored the absence in the festival of the SiL and the SWE, organizations which hold 1,200,000 Finnish students, fact which clearly revealed the opposition and dislike of Finnish youth toward festival. Garcias also remarkably referred to the fact that there were in Maisinki Tharmful clements which intended to toyouth the festival.

In firm opposition to the Fertival, Etnnich routh ascentied along Kelsinki streets -principally at Mannarheim Ave. - grying out coureageous-ly: "Long live free Finland, down with the Festival". In view of the dimensions the manifestation had acquired, the police tried to break it apart with horses, blackjacks, and tear has, but it anyway lasted until approximately 2 o'clock. Many young boys were arrested and the police cars' strens could be heard throughout the night. The Delgardation had already made the right contacts to produce an includent during the inaugural march which ould take place along Fannarheim Ave.

After Finnish youth had manifested in opposition to the Festival and had thrown stones on the official cars, we determined to produce a violent action. According to that folice declared, around 20 young men

jose antonio echeverria con lus ideas en marcha

-3-

were arrested that night.

JULY 29. SUIDAY.

Around 4 o'clock that afternoon, two members of the D E Delegation been gan to prepare a written cloth which textually said: "Freedom for the 15,000 young prisoners in Cuba". It was written in Spanish, English, and French. The Finnish translation as not ready in time and could not be presented. The cloth was a white sheet measuring 150 by 250 cms.

The rest of the group -4 persons- divided in two couples, one of which would take photos end the other one would inspect the place in order to find the most appropriate point to produce the incident.

At approximately 6:30 that late afternoon, Corlos Hernander, Juan Manuel Salvat, John Koch, and Enrique Beloyra, driving a Woopen car, tried to break the line of spectators and place the car in front of the Cubin Delection which has at that moment crossing the bridge to march before the parliament. But the people did not go back, so they parked the car there. Koch and Baloyra climbed to the top of the car and began vigorously crying out while unfolding the cloth. The other two Hernandez and Salvat- stayed standing in the street and later rushed sheed against the Communist Cubin Delegates. The police captured the two members of the Delegation that carried the cloth and the other two succeeded in eacaping in the middle of the confusion high as brought about. Photos on the incident were taken by Ana Diaz and Jose I. Rodriguez, members of the DRE, and also by the OBS and by photographers of a news agency of estern Cermony. The police seized the cloth and then released the two members of the DRE that had been captured, after having taken record of the in-

cident. From that moment on, all the activities of our Deligation were carefully followed by the Finnish police.

JULY 30, 1:0XDAY.

At 10 o'clock in the morning Juan Manuel Salvat called tone ther a Press confer ence in order to explain the motives is the incident produced the day before. All lestern news correspondents in Helsinki, as well as representatives of the Finnish Press, were present at it. Each was given a copy of our booklet "The Forversion of a University". We hadthe opportunity to meet several delegates from the Swiss Coordination Center, also a Cuban named Pedro Reuiz Quintero who at first seemed a little suspicious, and a Congo native member of Pax Romana. Me headed that afternoon to solicit credentials to take part in the official acts of the Festival as representative delegation of the not-Communist Cuba. After having visited two or three organization centers of the International Breparatory Committee of the Festival, we decided to go directly to Jean Garcias, President of the Committee and highest hie orchical figure of the Festival. Garcias avoided the problem telling us, as had the other officials of the Festival, that we should suscribe in the official Delegation from Cuba, which we evidently did not do.

An American newspaper can accommanied us in all our activities to obtain the credentials. He apparently seemed to master himself controlling his nerves during all the time. The downot remember his name, we called him Roger, and made a pleasant impression on us. During the rest of the day nothing important of remarkable took place, the acts of the Festival, which had already lost strength, were held relitively normally. Once

lose antonio echeverria con tus ideas en marcha

-5-

JVIX 31.- That afternoon we assisted at a talk, counting on the supposed guarantee offered by Jarcia - that we had a right to attend all the actions of the Festival - noger came along with us and recorded the discussion, around between the officials of the Festival and Juan Manuel Salvat and the Disc Silveira, who argued and objected that we had been told we had the fight to speak at the talk. We returned disclosing our protests in presence of the many reporters who had now come about us.

That night again, quarrels between the rinnish police and the apponents to the restival took place. Folice acted more severely this time, since the manifestations were greater and more violent than the previous ones. They stretched forth Mannerheim Ave. through various zones of the city.

Jose antonio echeverria con tus ideas en marcha

AUGUST 1 . NEDNESDAY .-

At 9 Sharp in the morning we went into the place where they were celebrating the final meeting of the Seminary for the Democratization of the Edutacion at the beginning they did not let us got in, but afterwards we met swiss young man who young men who granted us some credentials. This man was interrogeted by russians who kidnapped him during the event. Being us inside, we got a spot for speeching, and we had, also, the right of a three-minute speeching in case we waished to do it. There were 85 speechers before us.

At 12:30 pm. we had a brake. At the exit gate there were about 40 members of the red Cuba delegation who tried to provoke us. They were directed by Venegas and Alarcon. Nothing happened cause we were waiting for the evening session to produce a great end.

When we returned back it was 3.30 .m.. This time we couldn't make it. Then we began to discuss our points of view. In the ciscussion, more or less, Robert Pinel, President of the International Union of Students, told us we had no right to participate in the Seminary cause we were exited cubans. In all the discussion we were sorrounded by security agents of the International Proparatory Committee. The conversation was recorded by an example american correspondent.

The discussion finished when Finel broke it up. Another arcrican correspondent informed us that the finish police was seeking us with an order of extradiction. We decided there, to abandon the place and retire back to think talks about the new situation and take a decision. At 6pm keep and Ealoyra were intercepted by an armored jeep of the first an police.

DRE

They were conduced to the folice Station.

After a three hour staying there they put them in jail. Meanwhile Salvat, Hernandez and Diaz had another meeting with the press, and they informed public opinion about the evening deeds.

The Impartrial observers had violent reaction against the International Permanent Committee after they knew this deeds. The press failed trying to make contact with the imprisioned Dan delegates, because finish police didn't want a single word about it. The rest of our delegation was affraid from kidnapping, but after they ask information to police about both they knew the truth. They believed it because since days ago, our movements were watched, and by the were fact that a middle, aged guy from Argentina tried to make contact with us and afterwards, we could know he was JAIME CODOVIIA well known member of Nakaya.

The day finished with the findsh police finding out two automatic pistols in the luggage at the station wagon where koch and Baloyra were arrested. The pistols were a 38 Star and a 52 caliber automatic pistols.
