FORM V

The filling out of this guide must not be treated in a mechanical way as a work plan is done, since we must take into account that all cases do not show the same conditions and are not going to accomplish the same objectives. But if they serve us as a model to develop all the elements which we must know in connection with the case.

NOTE: The data that appear in this work plan are in the same order in which they appear in the Decalogue for the SI.

-14-

- e) Watch the traumas, psychoses, neuroses, or problems he has had in the past which still exercise an influence over him in the present. 2. Training for intelligence work. (Detail it.)

  - 2) Candidates to be recruited by the agent.
  - 3) Family members.
  - 4) Relatives without immediate interest.

To obtain these data we must fundamentally make use of the agent, and they will be obtained in the course of his training. We must also use our own means. This point has great importance, since these will be the persons of whom they will take advantage in obtaining information, moving up, and placing themselves in the desired position. Moreover, in case any information is acquired about them, if it only gives us a reference to the person's name, we will know who is meant, and thus we can avoid a great deal of work for our comrades abroad, since they will not have to send us these data and can restrict themselves to current information about the persons.

-16-

- b. Eventual. Once settled in the country of destination, on what objectives he will work and to what activities he will devote himself.
- 1) On whom he counts initially.
  - 2) Means of supplying him funds for operational use once he is in the country of destination. Cover of the agent for their management.
  - 3) If an accumulative salary is set up for him as a functionary of the Department, to what amount is it to grow, and is it to be paid him there?
  - 4) Economic compromise with members of the agent's family in Cuba (if he seeks some work, directly or indirectly; in the latter case, what cover family members will use with their neighbors and the rest of the family).
