AR : Forward undeveloped LIONION pulse camera film to Headquarters

1. Station Mexico City may begin immediately to forward undeveloped LIONION pulse camera film to Headquarters for processing. Headquarters plans to forward a positive and a negative copy of the developed film to Station JMWAVE for reading and possible printing use respectively. The original negative will be retained in Headquarters for record purposes.
2. As a result of discussion with Lawrence F. BARKER, Station Mexico City case officer, during his recent TDY at Headquarters, it was decided not to send any copies of the pulse camera film to the Station for the time being. Should the Station desire, Headquarters will forward copies as requested.
3. To insure most expeditious handling, the Station should send the films directly to the desk since KURIOT does not handle bulk jobs of this nature.
