c. After the LIENVOY Project was submitted for amendment, the Station notified Headquarters in MEXI 5412 of 17 July that the wise decision had been made to delay making any apprecias to Limmic regarding been made and the pulitical future of LICAPER and of LIENVOY could be better evaluated. Headquarters asked the Station in DIR 55521 on 19 July 1963 whether this decision to delay LICAPER might not affect the new LIENVOY equipment and asked the Station whether Headquarters should withhold the requisitions for the new LIENVOY equipment until notified by the Station. In effect, Headquarters now is holding the requisitions forwarded with HMMT-3380 until the Station informs Headquarters that a new basehouse has been selected, and that LICAPER can use the old equipment. MEXI 5452 notified Headquarters on 22 July that a separate cable would be sent answering the questions regarding the LIENVOY equipment.

SECRET

21 June 1963

MEMORANDUM FOR: Deputy Director (Plans)

SUBJECT : Request for Amendment of the LIENVOY Project

The LIENVOY Project is submitted for amendment. It was last approved on 29 March 1963 for a total of \$47,068 for the period 1 February 1963 to 31 January 1964. It is requested that this Project be amended for an additional \$23,000 for FY 1964 to cover replacement of equipment for the LIENVOY tap center.

24 1. Objectives: The LIENVOY Project covers a 24 [joint telephone tap operation, and an unofficial lisi-Bon relationship between the Station, Oll [ELEGANT] and 24 This lisison relationship is often 24 utilized by the Ambassador as a 24

2. Agents: This amendment does not change the agents under this Project.

3. Changes: Since June 1962, the Station has been considering moving the LIENVOY center for se-curity reasons. As the time for the Mexican Presi-dential election approaches, it may become more dif-24 ficult to conceal the activities and location of the LIENVOY tap center. The present equipment is large and difficult to conceal. The last LIENVOY Project renewal request stated that a move was contemplated 1) because of security reasons since the present base has been used for almost three years; and 2) to provide the new center with more mobile equipment, During the approval process, CI Staff commented that it concurred with the Station's plan to move the intercept center for the reasons stated, as the project activity was bound to become of interest to various opposition elements and the Station was well advised to make necessary changes to provide for and improve on the security of the operation.

This new equipment will be placed in a new, more secure basehouse which is yet to be selected, but

2

which will continue to be under the direction of LIELEGANT) and LIENVOY-2) representing the Moxicans, 08 and Willard C. CURTIS and Arnold F. AREHART, (repre-24) senting KUBARK) The workers in the present center will not know the destination of the rack-mounted equipment which is presently being used. It will be crated, and estensibly flown out of Mexico being replaced by the new, light-weight equipment.

The old equipment will actually securely be transferred to the LICAPER tap center, which is being established by LICEMPO-2) and which will be carried under the LICAPER Project. Approval has already been received from $CI_{2,2}$ and FI Staffs for the establishment of this new [semi-fliaison] tap center under LICAPER with the old LIZEVOY equipment.

4. Intelligence Production: LIENVOY is one of the most productive telephone tap projects in KUBARK of both FI and CE type information.

5. Effectiveness: In addition to providing intelligence through its tap center, LIENVOY also provides the Station with an effective on matters of prime interest to the Ambassador and the Department of State, as well as on subjects of KUBARK interest. 6. Problems: Presidential elections are to be held in July 1964. Since this project is conducted in LIELEGANTFORME ruture of this project. and the equipment involved will depend on The COS has stated that the equipment will remain in KUBARK control through the KUBARK Staff Agent who runs the control center, thus it would eventually be disposed of in KUBARK's interest should LIELEGANT's)

7. Liaison: This is an unofficial liaison relationship.

8. Inter-Agency Coordination: Not applicable

9. Plans: No other changes are contemplated during the present Project year.

10. Punds: Arnold E. AREHART, Staff Agent and KUBARK Case Officer in the tap center, discussed the appropriate new equipment with TSD specialists during a TDY to Headquarters for this purpose. The following equipment will be requisitioned upon approval of this Project Amendment:

32 Revere recorders

30 B-10's

- .-

•••;

1

14-00000

- 1 Regulator, automatic-line voltage
- 1 Oscilloscope
- 2 Dial simulators
- 12 Headsets Revere parts

The approximate cost for this equipment is \$23,000; bringing the total Project approval to \$70,068: \$18,210 for FY 1963 and \$51,858 for FY 1964; for the period 1 February 1963 to 31 January 1964.
