Jeremy Gunn FAXed me yesterday the more fully declassified version of MEXI 7029 (NARA #104-10015-10091), the cable which occasioned my earlier letters to Chairman Tunheim and to yourself. I have already telephoned him to express my gratitude for the Board's action on this matter, and also for the many other important documents which have now been released. I would however also like to record my appreciation in writing. The Board is doing important work, and it is beginning to make a significant difference to our understanding of the case. There were of course other DFS-related documents, not fully released, which I tentatively designated in my original letter to Chairman Tunheim. I am quite prepared to wait for a while to let the process run its course, but I hope the Board will not forget about them. Yours sincerely, Peter Dale Scott
