I applaud the review board for taking this step. Conflictsand inconsistencies in the medical evidence have mired the assassination in controversy almost from the start.In as much as you have interviewed both men yourself, I believe you are in aunique position to assist the presidentially appointed review board in theirwork to, indeed, help close the case. Your tape recordings of the conversationsyou had with both Humes and Boswell would be a great aid to the review board inevaluating their recent interviews with the autopsists. From what you stated tothe Conyer's committee in 1993, it appears they told you things that they havenever confided to anyone else.In the interests of furthering the work of the review board, and of helping toclear up the record as regards the medical evidence, I urge you to make yourtapes available to the ARRB if you have not already done so. The tapes of yourinterviews could make a difference. I hope all of us interested in the Kennedyassassination can count on your cooperation and support. We can, can't we?Thank you,Barb Junkkarinencc: Eileen Sullivan, ARRB David Marwell, ARRB
