**Subject:** Call from Edward T. Haslam

CALL REPORT Issue # 8Who initiated the call? Review Board's representative in the call: Dave MontagueDescription of the Call Date: 05/31/96Subject: Call from Edward T. HaslamSummary of the Call:He called me today to follow-up on his research re: a linear particle accelerator and the probability of LHO conducting intelligence while in New Orleans. He says he wanted to give me some "heads-up" on the new evidence which he is in the process of sending to us for review. He plans to send it to Tom Samoluk (in order to convince him that it is JFK related), but wanted to let me know about it as well.He feels his new findings are relevant based on the following:1) Mary Sherman's death was caused by an accident/sabotage by a linear particle accelerator located at the US Public Health Service Hospital (PHSH) in New Orleans.2)11/25 & 26/63 the FBI visited the PSHH looking for evidence of LHO & A.J. Hidell as part of the WC.3)The date of Sherman's death coincided with the date of her death & her body was relocated from the PSHH to her apt on St. Charles Ave in order to mislead the WC investigators.4)If the WC had fully investigated the activities concerning the PSHH they would have found a connection between the activities at the hospital & the covert activities of LHO in New Orleans.\* Haslam's documentation will explain this information in more detail.Haslam's information:7200 Montgomery #280Albuquerque, NM 87109505-296-4056
