Subject: Treasury, Postal

Full committee marked up on the 23rd - we did not come up during the hearing and it is the same amount as the House. I am not sure at this point if the bill will get to the floor before recess. While our appropriation is not likely to come up at a conference, the bill as a whole may not come up before September in the Senate as a whole. This makes it possible that the bill might not get done before the October adjournment. At any rate I talked with someone at the markup who is from NARA and they told me they have been advised to prepare for a six month continuing resolution as the bill might not be finished until early 1997.
