I think they are a bit generous to the agencies. I assumed thatwith the changes in the staff, there were new assignments on teams. I am alsounclear how many, if any,staff members are not on teams. I know one lawyer isdoing compliance. (Of course you know I think that we have a lot to do afterthe agencies swear they have done everything. Their definition may not beours.) I also would like to see all effort for outside papers to end by Oct. Ofcourse we won't refuse them if they are presented to us but that should not beon a 4th year agenda. Similarly, I think that if we can't make Cuban arrange-ments by Oct. we should drop that effort. I realize that we may not be finishedin our efforts to obtain Russian or Cuban records but any travel, etc. shouldbe completed. I understand that the nature of the undertaking required movingin many directions at once but I am somewhat dismayed that so many of these arestill hanging out there. The fact that we have not finished finite projectssuch as the presidential libraries makes us all very vulnerable. Feel free to copy our "correspondence" to other board members if you feelit would be useful. Anna
