**Subject:** NSA Documents

Eileen: I am not sure how things are going with Thom, but I am curious what the status is on the NSA documents. My understanding is that Christopher was going to be putting Final Determination Forms on ones that the Board voted on. There was a first batch of about 80 and then I think the Board voted more recently on a second batch of about 40-50. Don't quote me on the numbers, but the question is when they will be completely ready. That means Final Determination Forms on the actual documents that will go to the National Archives for inclusion in the Collection. Unfortunately, I don't think the content of the documents is going to be that interesting. However, if we can pick out a few that we can make available as "selected documents," we may get some press. As you know, Thom has been involved in this and has discussed it with Doug and Chris. Maybe he has an update. I know you will handle the situation diplomatically. I see the chronology as the following: 1. We get word that the documents are ready for Archives. 2. Pick out some "selected documents." 3. Have draft news release ready. 4. Check with Steve Tilley and Susan Cooper on timing of delivery of documents to Archives and release of news release. Agree on date. 5. Also, see if Cooper wants to do an Archives media advisory about the NSA documents, in advance of the actual release of the documents and the day we do our news release. 6. Have news release and selected documents ready for our chosen date for release. Please let me know what you find out. Thanks. Tom
