**Subject:** NSA documents for the upcoming ARRB meeting

FYI: I have the following information regarding NSA records delivered to the ARRB on 6 Aug 97, and which are currently being prepped for Board action at the upcoming meeting:1. Many of these records duplicate information that was already released to the public through previously released documents (both in 1993 and through prior Board actions).2. Of the 61 records delivered to the ARRB, 12 can be released in full, that is, NSA does not wish to take any postponements in 12 documents. Proposal: Since these docs do not require any Board action, they should therefore be removed from the rest of the records currently up for Board review. After the meeting, I will send these 12 records back to NSA with instructions to officially release them in full. They can then process them along with the documents voted on by the Board.3. Six documents require referral for evaluation of 3rd agency equities: -10064 requires referral to NARA for evaluation of Congressional equities. NSA has no objection to releasing this doc in full.-10200, -10203, and -10210 require referral to the FBI. NSA has requested that postponements be taken in these docs. -10164 and -10263 require referral to the Defense Intelligence Agency (DIA). NSA has requested that postponements be taken in these documents. I am planning on referring these documents to the appropriate agencies before processing them for ARRB action (ie, entering the information on Review Track). I will cc: our NSA poc on all referral correspondence. However, I am personally unaware of our poc's at DIA, so I will need to coordinate with Doug on this part of the project. 4. NSA returned two FBI records which they evaluated for NSA equities (124-10151-10091 and 124-10066-10455). I plan on entering these documents into Review Track, however, I will coordinate with Kevin Tiernan to make sure that the Review Track information entered covers both NSA's and FBI's requests for postponements. 5. Lastly, I am only responsible for preliminary, or basic review. Someone will have to be responsible for conducting supervisory review for these documents. I am assuming that Doug will be working on other pressing matters (Kodak, depositions), and that he will be unable to perform this task. Someone with an SCI clearance will need to perform supervisory review before these documents can be presented to the Board. At the present time, I am anticipating that I can enter the relevant data on Review Track for most of the remaining 43 records, however, please be advised that there are a few docs which staff may want to discuss before making official recommendations to the Board. END
