Subject:	Equity-Rec Series View, HSCA
	Jeremy asked me to review a HSCA-related memo of Joan's in which Joan refers to the above database. I believe Joan showed me a hardcopy of it when I was last in Washington, though she was not familiar with what had gone into the program that created it. I understand you and Brian and David worked on it. I've talked to Brian and have some sense of what the database is supposed to represent, but it would be helpful to me (in responding to Jeremy's request) if you and I could chat about your construction of this database: what went into it, what was cross-referenced, etc. Could you give me a call at your convenience (day or night) so you can once again lead my slow 19th century mind through the labyrinth of your 21st century computer-creations?
Body:	Many thanks!
