**Subject:** docs/NARA update

Joan is out sick today. When she returns I will go over some info I pulled together for her (I basically highlighted documents from advisories that she'll need to get together and ready for transfer.)I also talked to Sydney about 9 Ford Library documents that were noticed in the Federal Register and mentioned in our recent advisory for August. He said that he had nothing to do with those. He said he has only had limited involvement (i.e. entering information into Review Track) with Ford Library documents. I later discovered 3 more Ford Library documents that the Board voted on in June.I talked to Bob and Kevin about this -- apparently all Ford Library documents reviewed by the Board to date have had CIA equities. Bob is aware of these documents and is waiting for approximately six to be returned by the CIA.Don't mean to bog you down with the minutiae, but thought you might want a little update.
