Subject: Miami

Body: I still would like to do a quick trip to Miami in order to try to generate some press regarding our search for records. I cannot do it too late in our tenure, then there will be little time to process any response we might get. I don't want to lose sight of this goal, Have there been any developments? What are your current thoughts on this matter? On another topic, it sounds like the CBS materials are very interesting. JTY
