Subject: Re: Misc.

Tom: Thanks for the note. I was sorry to hear about your late trip on Friday -- by some miracle, I actually got in to Mpls about 15 minutes ahead of schedule, by about 6:30. It has snowed most of the weekend, however. It really looks like winter now. The informational items all sound good. I have listened to some of the tapes, perhaps we can talk this week. Miami in May sounds fine, just so we get it done sometime. I am anxious to hear about the Lee-MeMaio recommendations. Have you heard anything? Great Super Bowl today, huh? It was nice to deflate my Packer neighbors a bit. Let's talk by Tuesday. Jack _____

Samoluk" <Tom_Samoluk@jfk-arrrb.gov> at Internet Date: 1/24/98 9:26 PM Jack: Good to see you this week. I hope it was a fruitful trip for you. And I hope that you have gotten to listen to the tapes. Any thoughts you have on what our next step should be on how we "process" these would be helpful. A few other matters: I wrote to Kenny O'Donnell's daughter and will follow-up with her re: records. We will FedEx you a final news release, selected documents and suggested talking points for the Cuba II document release that we are doing on Thursday, January 29. You will get it on Tuesday. The NSA documents the Board voted on will be helpful in planning the course relative to Miami. Assuming, there are no appeals, we should have a good bunch to go there with. At this point, I'm thinking piggybacking it with your May trip to Miami, if that's okay with you. By then, we'll have other documents, I think. The February 18 interview with Chip Selby for his WC documentary is scheduled for 10:00 a.m. He'll get us questions in advance and I'll work up some suggested talking points for you. I hope to try and line up Evan Thomas for lunch, but did not call him this week because he is in the middle of the coverage of the President. I'll try him this coming week. I hope your travels went better than mine. I did get to Boston on Friday night, but not until midnight. Oh well, it was better than an overnight at the Dulles terminal. Tom
