**Subject:** Potential bombshell... (fwd)

Perjured witness below...----- Forwarded message -----Date: Thu, 16 May 1996 16:57:06 -0600From: Richard Bartholomew <bart@admin.inetport.com>To: lpease@netcom.comSubject: Potential bombshell...[...]My purpose for this email is to pass on something very interesting. While doing research for my ongoing battle with an OP/MOCKINGBIRD clone on theJFK\_ASSN echo, I came across something that seems to have fallen through the cracks of the major assassination literature. I posted it subtly this morning on the above echo but I thought I'd pass it on to the serious research community. Dr. Vincent Perry Guinn, who did the neutron activation analysis tests of the ballistic evidence for the HSCA, committed perjury. His HSCA testimony (1 HSCA 557) reads: "Mr. FITHIAN. Dr. Guinn, this is not meant to be an embarrassing question, but I think I must ask it. Mr. Chairman, a recent article in the New Times magazine stated that you had worked for the Warren Commission and, therefore, your conclusions for this committee would be implicitly biased. "Did you even work for the Warren Commission or work for the FBI in connection with the analysis of these evidence samples?" "Dr. GUINN. Neither one. I think Mr. Wolf called my attention to the existence of this article, which I haven't seen, and I don't know where they got their misinformation, but I never did anything for the Warren Commission, and although I know people in the FBI, I have never done any work for them." "Yet the New York Times (Aug. 28, 1964, p. 32) reported: "RADIOACTIVE TESTS USED IN OSWALD CASE GLASGO, Scotland, Aug 27 (UPI) - The use of radioactivity in criminology may determine whether Lee Harvey Oswald killed President Kennedy, a San Diego, Calif. chemist said today. Dr. Vincent P. Guinn, head of the activation analysis program of the General Atomic division of General Dynamics Corporation, has been working on the problem with the Federal Bureau of Investigation. 'In the case of murder or any crime involving a gun,' Dr. Guinn said, 'there is a paraffin test where a wax impression is taken of the hand and cheeks. 'There is a need for a better procedure and about three years ago we began working on activation analysis. 'We bought a similar rifle from the same shop as Oswald and conducted two parallel tests.' He said the evidence had been given to the Warren Commission and would be included in the report soon to be published on the death of the President." Guinn swore to tell the whole truth. He mentioned none of this even when given the perfect chance. This is outright perjury and all of the major authors missed it. I discovered it first while combing the JFK literature on Guinn. Mark Lane mentioned Guinn in Rush To Judgement (pp. 152-53) citing a New York World Telegram and Sun for Aug. 28, 1964. I then cross-referenced the date in Guth and Wrono, and BINGO. Nailed the little liar. What do you think? Later, Richard if I don't see ya in the future, I'll see ya in the pasture.
