**Subject:** Re: REVELATION ON FILM

Mili...one thing to remember is that ALL cars in the motorcade did not necessarily PERFORM ACTIONS IN CONCERT. That is, no two cars have the same actions AT THE SAME TIME...some may have slowed, some may have stopped 1 sec., 2 secs. 3 secs, etc., and at different times. Thus the press photographers car may have stopped for 5 seconds, 3 seconds after the presidential limo only slowed dramatically. We have no way of knowing, especially IF the films have been tampered with. Witness testimony is another thing...so many said the limo came to a stop!Jack
