Subject: Re: De Mohrenschildt

Dear John Judge: You said that you would review the books in Open Secrets if I send you copies. Well, I would consider sending one at a time. I read the unfavorable review in Fourth Decade when the reviewer didn't have the book to review. I wondered if this was done because of Patrick Fourmy's (Prevailing Winds) selling my material at the 1994 conference and not compensating me for the ten volumes he told me he sold. I understand others have similar problems like this. I gave you a hard time because you had referred me to Fourmy, but even though Fourmy is a governing board member of COPA you can't be held responsible for his actions. Mr. Fourmy told me he stood to inherit all of Mary Ferrell's collections, I never could understand why COPA would have Mary Ferrell as a governing board member when her granddaughter had married de Mohrenschildt's grandson. This to me is a total conflict of interest. I appreciated that Andy W. was able to erase the grievance at the last COPA conference in D.C. with positive results. People that know me know that I am out in the open and have heard good things on the research. I am not a great writer, I admit, but every day is a learning process. I have a tech writer who is going through all of the volumes. One and Two are completed and volume VII is being processed right now. I have scanned into the computer more than 700 photographs and CIA and FBI documents to improve the photocopying quality. I am adding material to vol. VI which deals with Henry Luce. As you know Oliver Stone's movie JFK was produced through Time-Warner which obtained permission to Zapruder's film through Time-Life. There are four collections of documents on the East Coast that I have to review. What are you trying to say? when you wrote: "Bruce Good thing we haven't all been as generous as you with our findings, nobody would know nothing! Only in Amerikka can the truth be copyrighted! John Judge" What are you saying. Do you really want me to send you nine volumes on the JFK assassination for free? It was my research which allowed me to win a case against the U.S. Postal Service. I did it without an attorney. This money along with my spare time has allowed me to spend five years and \$120,000 on de Mohrenschildt and the JFK Assassination. Why would you say something like that if you want someone to give something to you? How can one get a fair review when they are getting insulted before the review? Sincerely, Bruce C. Adamson
