Subject: Mr. Garrison says George Bush is A.O.K., but is playing dead when confronted with the evidence against Bush
KEVIN COSTNER JAY LENO 2000 NICHOLS CANYON P.O. BOX 7065 LOS ANGELES, CA, 90040 DUBLIN, CA, 91510
January 16,1996 To Kevin Costner and Jay Leon, Gentlemen: The other night I watched you on The Jay Leno Show and was drifting off into sleep when I heard you say that George Bush was a good guy. Personality wise he may be, but I could hardly believe my ears, knowing what I do. Having come from a family from Hollywood, I realize the power and influence one has when they are looked up to as an actor. Uncle Harold wrote more than 300 songs for movies, Meg Foster is a cousin and so is Robert Easton. Your part in the movie JFK was purely fictional and it does not make you an expert on what really happened when the government was overthrown on November 22, 1963. You have not made such a claim, but because you played the part of Jim Garrison people respect your opinions and they should. You are a charismatic individual and myself I spend much of my time examining the past and because my research is so controversial it is hard to get the real story out. I know this sounds disrespectful to former President George Bush, I have cousins who are friends with Mr. Bush, they too don't want to get involve but they still accept me, have sponsored and have edited my book The Life and Times of Captain George W. Ely. I have spent five years and a \$120,000 investigating the closest friend of Lee Harvey Oswald, George de Mohrenschildt. Have you ever heard of this CIA agent and did you know that he was a good friend of George Bush's? Then consider that: 1). George Bush called the FBI office in Houston on Nov. 22nd; 2). J.Edgar Hoover briefed George Bush of the CIA on November 23, 1963 on the JFK assassination; 3). Bush was nominated as CIA Director in 1975 he had failed to disclose to the Senate that he had known de Mohrenschildt since 1942; There were three Congressional investigations were in the making looking at the possibility of the CIA being behind JFK's assassination; 4). Bush failed to tell the public that he had known de Mohrenschildt when he signed into law The JFK Review Board Act into law and this board is spending \$2 million a year. 5). George Bush was suing Governor John Connally (who was riding shotgun with JFK) before the JFK assassination over political battlelines. With all due respect you are either ignorant of George Bush's real background or naive. I have evidence proving that Henry Luce was behind the assassination of Kennedy. You should recognize the name for he owned Time-Life which bought the Abraham Zapruder film. Both Dimitri and George de Mohrenschildt had worked for Luce. George de Mohrenschildt's fourth wife had worked with Abe Zapruder at a Dallas Clothing Company. I believe the Zapruder film was a staged filming which Oliver Stone's movie had benefitted from. The movie JFK had positive results but welcome to the real world. Please continue to be George Bush's friend, but I would like to share with you FBI documents which circumstantial are compelling. If your willing a volume could be supplied that I have written on Bush's
