**Subject:** Apology

Dear Eileen: I wish to apologize for the correspondence I sent to you over the weekend. It followed 2 weeks of exasperation and sometimes terrifying correspondence from others who contacted me in regards to the subject matter I addressed to you. You would not believe the warnings and stories I received about this. I have been a government employee for most of my life and I know for a fact that government is people; human beings. To some people Government is an evil empire straight out of star wars. I think I met the Klingons this past week, and there are lots of them out there on the web! I am sure you have seen and/or heard the crazy things being discussed and posted on bulletin boards and websites on the Internet concerning that tragedy 34 years ago and your committee's work concerning it. I was 11 when it occurred. People are now discussing Oswald as some sort of Federal Agent working to help the ATF sting illegal gun sales! This is the new explanation for the weapons he used to kill John F. Kennedy and the policeman who stopped him in flight. I have now seen Mr. Oswald go from a wife beating loser to a Federal Agent! Next year they'll have him with the Joint Chiefs, I suppose. When that fellow told us that story several years back I doubted him severely, however, I later thought perhaps the possibility that what he described existed might put an end to the lunacy surrounding that tragedy. I can see now that nothing is ever going to satisfy those with a child's mentality. In the interest of American History I came to you, but now I am not so sure I did the right thing. None of this justifies the message I sent you. I had just had enough of the craziness aimed at me the past week and I am truly sorry I sent that to you. I hope you will forgive me. Sincerely:Frank W.
