**Subject:** New BBC Documentary

Dear Ms Eileen Sullivan I enclose a message I posted on the alt.conspiracy.jfk newsgroup, today. It might be worthwhile for the ARRB to contact Matthew Smith about the BBC Documentary. It sounds like an important development in the case. I don't have his address to hand. But his phone number in Sheffield, England. is: 0114 2304672 I think he would also like to be added to your mailing list. Mike Royden. mike.royden@virgin.net New BBC Documentary about Joachim Markus. The BBC are to show a television documentary on Joachim Markus, Germany's leading expert in photogrammetry. Markus had painstakingly put together a virtual reality Dealey Plaza, and has fed in all available details about the JFK Assassination, even going to the trouble of employing a firm of architects to do a new survey. The programme includes contributions from British Author and Researcher Mathew Smith, who has been working with Markus on the project for the last couple of years. The BBC have taken the research seriously and have even gone to the trouble of showing the results to President Ford and getting his reaction to it. Markus's work may prove to be the definitive answer to the number and sequence of shots fired at JFK. The documentary will also look at the Warren Commission findings, including the single bullet theory. It will be shown on British Television: On BBC2, Correspondent Series, 7.30-8.00pm, Saturday 17 May 1997. So don't forget to set your video recorders. Mike Royden
