**Subject:** Help!

Dear Eileen,I heard a story recently which alleged that Gerald Ford had admittedto having made some kind of alteration to Warren Commission diagramsconcerning the position of President Kennedy's neck wound. Now, thissounds on the face of it to be entirely absurd, so I'm assuming thatthis guy must have misquoted or misread something. He says he got thestory from here (the AARB), and that it appeared in the Dallas DailyNews on July 3. Now, tell me please: is this a silly story? Is therea grain of truth to it? Does anyone at the AARB have anything to sayabout what role, if any, Gerald Ford played in the drawing of the neckwounds? Again, I'm a little embarassed to even be asking aboutsomething which sounds so obviously crackpot-ted. I've been locked ina discussion with a conspiracy nut, and he's driving me a littlebatty.Thank you,Mike Kaplan(mkap@mail.med.upenn.edu)
