Subject: call from Anna

Body: Anna called today and is looking for about five documents (preferably "before and after") that reflect that the Board can open documents without a threat to national security. We discussed the recently released NSA documents, which she wants.She also mentioned that this panel she will be a part of would only really be interested in NSA and CIA documents. Any thoughts on CIA documents that fit the bill? Thanks.FYI: according to Manuel, because the NSA documents were not available "before," we have no "before and after" NSA samples.
