Amazingly, there was a Mr.X with a Dr. Berger on the show. Mr. X who is in the medical supplybusiness proceded to show a jar that allegedly contained a decentsized skull fragment and brain tissue that Mr. X said he retrievedfrom Elm Street on 11/22/63. Dr. Berger had examined the specimensand reported that it appeared to be brain tissue traumatized bya gunshot, a human skull fragment, and the components of theformaldehyde solution in which the items were suspended dated to1960-1970.The size of the skull fragment is what really caught my attention.Did anyone else see this? Don't know if it means anything but itis interesting. Maybe the Board should look into it?Kathlee
