**Subject:** BriLab tapes and transcripts  
I am working on a press release about the release of records in New Orleans (Garrison records, grand jury transcripts, and BriLab materials). Jeremy told me that the court ordered seal has been lifted on BriLab tapes and transcripts containing references to JFK and that they soon will be released (if this is inaccurate, then I heard him wrong -- he told me this the day I left work feeling yucky).Anyway, if you could provide me with some background and current information on the BriLab materials for the press release, I would greatly appreciate it.
