Subject: E-releaeses

I would like to receive notification of press releases by e mail. My effortsto get in touch by telephone have failed. A request for information ondocuments follows by USPS. In particular, am curious aboutDOS FBI FBI119-1003-10172 124-10144-10190 124-10246-10327DS HQ DL39-141-046 62-109060-7062 89-43-9358, 9359The first combines an origin date of 1959 and Finland with the name of...Jack Ruby; the want of SCI classification vitiates heavily against the obviousinterpretation, but my curiosity is aroused. The second I am familiar withonly in its sanitized 1994 release, which leaves no information beyond an(apparent) number of Carcano clips imported from 1960-1962 and an interviewrequest, which yielded nothing of interest. The last, which I have not seen,refers back to the second and has also been released only in earlierredaction.The last two refer to the rifle in some fashion. Why details of Carcanoimportation a decade prior should rate "Secret" and "EX PROC." is a puzzling.Likewise, the interview was undertaken in the hope that an amateur researchercould provide "new relavent information." Even if no answer were found, thesubject of the question(s) should be interesting.Bill BanksLLLIIBB@AOL.com707/552-6812
