Subject: RCMP

Ms. Sullivan--I tried sending this message a few days ago, but I guess your server was down. I received no confirmation, so I will try, again. I found a reference on the I-Net to an investigation done by the Royal Canadian Mounted Police regarding the origins of the rifle and the pistol supposedly owned by Lee Oswald. Both those reports present information contrary to the official record. They indicate both weapons came from Canada through Canadian International Arms of Montreal, not from Chicago and San Diego. C. I. A. (no joke...) was a company heavily involved in the Iran-Contra arms deal. Has the ARRB been in contact with the RCMP and do you have their investigative reports regarding the assassination? Supposedly, these investigations were done at the behest of the FBI but the reports were never given to the WC and were not considered by the HSCA staff, though references to them appear in the archives according to the writer of the website. The RCMP also supposedly has reports putting LHO in Montreal for a couple of weeks in the summer of 1963... Second, We're making progress -- slowly -- on the material Charles Mazal sent you. The most important thing so far is I sent him the photo of a apartment where the CIA camera unit was stationed, according to the CIA. The photo was published in the WC 26 volumes. Charles said that is not the house and that it is not even the same neighborhood. He said the Cuban and Russian embassies were next to each other on a modern boulevard and the camera site was in a five or six story building. The camera site was on the third floor of that building. He doesn't believe the photos of the man the CIA at first identified as Oswald were taken from that floor. He was a newspaper editor in Mexico City and is knowledgeable about photography. He says the angles are all wrong for the photos to have been taken from the 3rd floor of the building he knows as the CIA photo site. His son and he are planning a trip to Mexico to check out the site and gather documents supporting his story. They will be trying to get the newspapers which published the "Oswald" photos, real estate records on the safe house for 1963 and photos of the actual CIA photo site. The writer of Canadian site, BTW, believes, the assassination was carried off with direct involvement of Canadian drug and gun dealers working with Mexican dealers and American intelligence people involved in the drug trade. Dave Dix
