Subject: Re: Medical info request

Dear Eileen,>Perhaps I could send you the staff memo that accompanies the deposition transcripts. That would be great if you could do that. At this time, I'm not going to order the \$96 package of documents, but I know that a full set is available from JFK Lancer and other similar book dealers, when I have the cash to order them. Thanks anyway for trying. Fast question--when the Board's final report to Congress is completed, will it be available to the public at no charge, as your fiscal year reports are, or will there be some charge for the document? As I know you are extremely busy, I won't take up any more of your time, but please know that I, as a researcher, sincerely appreciate the time you and the Board have taken over these past few years to shake the truth loose about the Kennedy assassination from the Archives and other agencies/people/places with documents. I for one will be sorry to see the Board be dissolved, as I know there are many more documents that need to be included in the collection, and it is most unfortunate that certain government agencies would rather lie about the extent of their collections and wait out the life of the Review Board. It is also a shame that, for all of its diligence and hard work, the Board's life cannot be extended. I wish you best luck in your next job! Sincerely, James P. Sawa JSawa@aol.com
