**Subject:** Question re Department of Defense

Dear Eileen It has just occurred to me that most of the records the ARRB has been able to declassify are FBI and CIA documents. Has there been any endeavour to liaise with Department of Defense namely Army and Naval Intelligence as to any records they may have? I have listings of batches that have been released but from memory they were all FBI and CIA. It has been accepted since the late 1970's that the military destroyed files on Lee Harvey Oswald. Has the ARRB been able to confirm this (as was told to the HSCA) and has anything of interest surfaced during the last four years? To my knowledge (which I admit is by no means exhaustive) there hasn't been much of a mention regarding DoD. (I will graciously accept a blasting if I'm wrong!) Thanks Kate - Sydney Australia P.S. I read, the transcript of your July Open Meeting (transcribed by Joseph Backes). I was amused at everyone's amazement that someone all the way from Australia (me!) would be interested in the ARRB. I was glad that I got everyone talking about the postponed records. The internet has made the world a smaller place and your work has indeed generated interest from around the world - even down under!
