

MEMORANDUM

From: Robert J. Skwirot

Subject: Recommendation of Not Believed Relevant (NBR) Status for Record
Number 104-10079-10281

This record from the Sequestered collection, a cable and cover sheet, was denied-in -full in 1993 as not relevant to JFK. CIA requests that the Review Board continue this status because the record reveals crypts and operations targets outside the frame of reference for the JFK story. Since the time frame and the location are not part of the JFK story, the Review Board staff agrees that the information in this record can be postponed as not believed relevant. For substitute language the staff recommends: "Routing sheet and cable that contain information on CIA operations not believed relevant to the assassination of President Kennedy."
