Subject: Instances of ERTHYROID-3 in the Mexico City Chron
File No. 4.20.2.5

These are the instances of ERTHYROID-3 that occur in the MC Chronology; the NARA copy that we have available to us indicates no release of the crypt; in item MANA 4615, some physical characteristics are described, but not enough to fully identify him. In no case is his true name ever released.

In each context, there is an indication of a relationship with the Agency, as they ask for him to be brought from his place of origin to Mexico to help with the interrogation of ALVARADO. However, the exact detail of this relationship is not elaborated on at any point; the documents and summaries all are concerned with ALVARADO and ERTHYROID-3 is merely tangential.
