ASSASSINATION RECORDS REVIEW BOARD
NOBLESVILLE HS PROJECT 1996 II
FBI DATABASE PROJECT

<u>Background:</u>   In order to keep track of FBI information being released by the ARRB, we have established a database.   Ideally, we would be updating this database as information is released; unfortunately, other matters have higher priority, and there has developed a considerable backlog of released information.

<u>Project:</u>   Following instructions given you by *(name of FBI team member here)*, add sigificant information to the FBI released database.

Note: Your assignment is to enter this information.   At NO time shoud you look elsewhere in the database or computer system.   Doing so would constitute an unauthorized access or attempt at access, and would be dealt with accordingly.
