In addition, we have developed a need to pull the files of two persons we now believe would have information relevant to this story: Steven Weiss, and Frank Ellsworth.

Beyond this, there are approximately 115 records which we have requested from NPRC that had not turned up at the time of our last visit which may be located during a second visit.

Based on the success ratio and positive results of our last trip, it is my opinion that a second trip to St. Louis is justified and should be undertaken as soon as is convenient for the staff. Given that other ideas for name searches have resulted from the reviewing of these files, it is conceivable that further names could be added to this list at a future date.
