

MEMORANDUM

July 25, 1995

TO: Jeremy Gunn

FROM: Christopher Barger

RE: Gene's notes and other military info

FILE No. 4.0.2

Gene's notes are random and are difficult to decipher: most times, it is unclear whether he is referring to documents already at Archives, documents he has been alerted to, or documents he expects might exist. In addition, I was unable to find any mention of a Mr. Gleason anywhere. The two names that he mentions most are a Sandi Alport and a Jim Mallet. I was unable to discern where they are affiliated.

However, I did find a list Gene had made of possible document areas, a copy of which is attached. Nothing concrete is indicated; however, these would be good places to initiate searches.

Dennis and I also discussed this issue after he returned from Archives II today. In the letters the ARRB sent to the military branches a month ago, we had no indication that the Marine Corps had given the Review Board any documents at that time. Neither Dennis nor I are aware of any specific documents that exist for us to request; we have only educated guesses as to where to look.
