

Memo

TO: Board

Subject: Request for Reconsideration

The FBI has requested that the Board reconsider its determination in the case of an informant postponement made at the last meeting. In this particular case, the Board agreed to postpone the numerical portion of the informant's symbol number, but declined to sustain (on a 3-1 vote) the FBI's requested postponement of a characterization of the informant that would clearly identify the informant. A review of the record makes clear that the Board understood that the informant in question was still living, and that there was evidence in the informant file that the informant did not wish their identity to be revealed. In addition, the Board understood that the release of the postponed information was tantamount to a release of the informant's identity.

Last week, the FBI interviewed the informant and has supplied the attached FD-302.

NOTATION VOTE

Request to reconsider record 124-10058-10009 based on new evidence provided by the FBI subsequent to the November Board meeting.

In favor _____
