

Memo of Understanding

The Security and Emergency Planning Staff (SEPS) agrees to supply security clearance adjudication support to the Assassination Records Review Board (ARRB). This support will include the review of Sensitive Background Investigations (SBI) conducted on current and prospective ARRB staff by the Office of Personnel Management. The SEPS will make a recommendation for the granting or denial of clearances on a case by case basis. This recommendation will become a permanent part of the employee's security file.
