

Proposal for Assassination Record Roster

Whatever definition the Board devises for an "assassination record," we will have to develop a mechanism for determining which records meet that definition. I propose establishing an Assassination Records Roster which will list those records which fall under the purview of the ARCA. Whether a record or group of records is included in the ARR will be up to the Board by way of formal determination. The public may propose including records on the ARR, but must provide evidence of the relevance (and non-frivolousness). We will notice in the Federal Register all records proposed for inclusion and invite comment. Within a prescribed period, the Board will make a determination which will also be noticed in the FR.
