Re: Results of my review of the LBJ Library Material File No. 4.25.5

This memorandum is a catalog of the LBJ Library material I have reviewed. I was able to review fifty-six boxes of the material and part of the fifty-seventh. Listed below are summaries of the contents of each file folder, listed in order of placement within the box, and "Potential Documents of Interest" that I would have photocopied for your review had our copy account been set up. For your convenience, I have submitted a separate memorandum listing only the "Potential Documents of Interest."

To summarize, at least 75% of the material I reviewed consisted of copies of letters sent by citizens, copies of the responses to those letters, and copies of newspaper and magazine articles. Most of the government documents that did appear yielded nothing that would lead to the location or indicate the existence of other documents. Most of these government documents were internal White House memoranda circulated between various staff members.
