Once documents have been reviewed by originating agency, what is done with the documents?

What is the status of documents that are under appeal?

Have all assassination-related records been identified? What actions should be taken to ensure all NSF files have been reviewed for assassination-related content?

What arrangements can be made to transfer copies of the unredacted versions of postponed/sanitized documents to the Board?

What is the status of the tape recordings? (According to the database 45 of the 73 *Postponed* RIFs are tape recordings)
