

# MEMORANDUM

September 30, 1997

To: Laura Denk

From: Jessica DiFrisco  
Ben Rockwell  
Pete Voth

Subject: FBI/CIA Liaison Files

We have completed our initial review of the FBI/CIA liaison files, file #62-80750, sections 48-91, and the June Mail File from the following relevant time periods: 1957-69, 1975-79. At this date, the FBI has not yet furnished to our review team a few outstanding sections: 59-63 and 65-67. The FBI will make these sections available for review as soon as the FBI locates them.

Within the collection, we identified 67 assassination related records. We have listed these records on the following page. The majority of the files came from serial range: 62-80750-4179 to 62-80750-4229. We recommend that a member of the FBI team review the selected records to verify that they meet FBI team requirements for assassination records.

The request encompassed individual serials which we were unable to review, as the FBI had relocated the serials to other files. Examples of these types of records include: EBF's; files deemed more relevant to another file classification; and top secret serials. These files are also listed on the following pages.
